2. Pre-Requisites

Not established. Documentation and bibliography in English can be used.

3. Justification in the curriculum, relation to other subjects and to the profession

Nursing professionals must know some conceptual bases to provide quality care with the appropriate use of not only resource management, but also applying legislation on aspects of dependency and participate in decision making, understanding the economic and social repercussions of their actions

4. Degree competences achieved in this course

Course competences

Code	Description
CB06	Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context.
CB07	Apply the achieved knowledge and ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to the area of study
CB08	Be able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on social and ethical responsibilities linked to the application of knowledge and judgments
CB09	Know how to communicate the conclusions and their supported knowledge and ultimate reasons to specialized and non-specialized audiences in a clear and unambiguous way
CB10	Have the learning skills which allow to continue studying in a self-directed or autonomous way
CE01	To know the applicable legislation, concepts and legal principles in situations of disability, dependency and long-term care.
CE02	To conduct comprehensive and systematic assessments in changing situations of health, suffering, disability or dependence of the person using the appropriate tools and frameworks, taking into account the most relevant physical, social, cultural, psychological, spiritual and environmental factors.
CE03	To understand the basic management tools of the health sector and the functions of health and social coordination and continuity of care of the population in need of long-term care.
CE04	To understand current health systems, their management policies at different levels of care, and the programming and evaluation instruments of health organizations.

5. Objectives or Learning Outcomes

Course learning outcomes

Description

The student will be able to identify applicable legislation in different situations of disability, dependency and long-term care.

The student will be able to perform nursing assessments in situations of suffering, disability or dependency using specific tools and frameworks of the nurse discipline.

The student will be able to identify the basic management, programming and evaluation tools of health organizations.

6. Units / Contents

Unit 1: Disability and Dependency from a Legal Perspective: The Legal Response to Disability and Dependency. Applied legal terminology. The legal protection of disability and dependency at the international level.

Unit 1.1 Spanish legislation on dependency and disability: the protection of disability in the Spanish Constitution. Law 51/2003, of 2 December, on equal opportunities, non-discrimination and universal accessibility for disabled people. Law 39/2006, of 14 December, on the promotion of personal autonomy and care for disabled people

Unit 2: Legal principles that regulate disabled people in the field of health: Autonomy in decision-making: consent and advance directives. Lack of autonomy in decision-making: consent by representation. The process of incapacitation and other processes of legal guardianship.

Unit 3: Socio-health policies on dependency and disability: Socio-health needs related to disability and dependency. The system of social-health care in Spain. Coordination and integration of care levels. assessment scales to measure dependency

Unit 4: Management of assistance resources in dependency and disability: Management models in socio-health centres. Person-centred comprehensive care. Patient safety. Coordination of the multidisciplinary team. Administrative and material resource management.
