

# UNIVERSIDAD DE CASTILLA - LA MANCHA GUÍA DOCENTE

Code: 53341

#### 1. General information

Course: STATISTICAL DATA ANALYSIS

Type: ELECTIVE ECTS credits: 4.5

Degree: 316 - UNDERGRADUATE DEGREE IN ECONOMICS Academic year: 2019-20

Center: 5 - FACULTY OF ECONOMICS AND BUSINESS Group(s): 10

Year: 4 Duration: First semester
Main language: Spanish Second language: English

Use of additional languages:
Web site:
Bilingual: N

Lecturer: NOELIA GARCIA RUBIO - Group(s): 10									
Building/Office	Department	Phone number	Email	Office hours					
Facultad de Ciencias Económicas y Empresariales. Despacho 3.13	ECONOMÍA APLICADA I	926053545	lnoelia.garcia@uclm.es	Ver la página web de la facultad y Moodle de la asignatura					

#### 2. Pre-Requisites

It is recommended to have coursed the subjects on Statistics for Economics and Statistical Inference

#### 3. Justification in the curriculum, relation to other subjects and to the profession

Today it is very common, in the world of Economics and Business, to have a great amount of data and manage computer tools for proper extraction of the statistical information they contain.

In this process, the knowledge and use of appropriate statistical techniques is fundamental to the discovery of new and meaningful relationships and behavior patterns within the data. The aim of the course is to provide students with the tools necessary for the representation, description and extraction of patterns and relationships between variables in multidimensional data, which is known in the statistical literature as "data mining".

### 4. Degree competences achieved in this course

Course competences	
Code	Description
E03	Ability to find economic data and select relevant facts.
E06	Application of profesional criteria to the analysis of problems, based on the use of technical tools.
E11	Diagnosis and assessment skills to conduct structural and cyclical reports, as well as economic forecast summaries on the reality of the economy in Spain, the European Union and in any of the product sectors and factor markets. To do so, it will be necessary to understand and use common handbooks, as well as articles and, in general, leading edge bibliography in the core subjects of the curriculum.
G01	Possession of the skills needed for continuous, self-led, independent learning, which will allow students to develop the learning abilities needed to undertake further study with a high degree of independence.
G03	Develop oral and written communication skills in order to prepare reports, research projects and business projects and defend them before any commission or group of professionals (specialised or non-specialised) in more than one language, by collecting relevant evidence and interpreting it appropriately so as to reach conclusions.
G04	Ability for the use and development of information and communication technology in the development of professional activity.
G05	Capacity for teamwork, to lead, direct, plan and supervise multidisciplinary and multicultural teams in both national and international environments.

## 5. Objectives or Learning Outcomes

## Course learning outcomes

Description

Train the student to listen to and defend arguments orally or in writing

Train the student to work out problems in creative and innovative ways.

#### Additional outcomes

The student will obtain the ability to conduct a preliminary analysis of the data, identifying relevant information and preparing it for further analysis. The student will know identify the appropriate statistical technique, based on the data available and taking into account their nature, to achieve the objectives. The student will get the ability to properly apply each statistical technique through appropriate tools, mainly using the statistical programming environment R. The student will be able to draw the relevant conclusions and know how to analyze and transmit them appropriately for decision making in a business economic scope.

## 6. Units / Contents

## Unit 1: Introduction to Multivariate Analysis

Unit 1.1 Data and measurement scale

Unit 1.2 Introduction to Data Mining and software R for statistical computing

Unit 1.3 Descriptive and exploratory data analysis

Unit 1.4 Detection of outliers

Unit 1.5 Treatment of non-response

## Unit 2: Clasification and comparison of groups

Unit 2.1 Linear discriminant analysis

Unit 2.2 Cluster Analysis

Unit 2.3 Analysis of variance

#### Unit 3: Data reduction methods

Unit 3.1 Principal component analysis

Unit 3.2 Factor analysis

## Unit 4: Models for qualitative data analysis

Unit 4.1 Contingency tables and measures of association

Unit 4.2 Correspondence factor analysis

Unit 4.3 Multidimensional scaling

7. Activities, Units/Modules and Methodology								
Training Activity	Methodology	Related Competences (only degrees before RD 822/2021)	ECTS	Hours	As	Com	R	Description
Class Attendance (theory) [ON-SITE]	Lectures	E03 E06 E11 G04	1	25	N	-	-	
Class Attendance (practical) [ON-SITE]	Combination of methods	E03 E06 E11 G01 G03 G04 G05	0.5	12.5	Y	N	N	
Study and Exam Preparation [OFF-SITE]	Self-study	E03 E06 E11 G01 G04	1.2	30	N	-	-	
Writing of reports or projects [OFF-SITE]	Group Work	E03 E06 E11 G01 G04 G05	0.86	21.5	Υ	N	Υ	
Other off-site activity [OFF-SITE]	Self-study	E11 G01 G03 G04	0.74	18.5	Υ	N	Υ	
Other on-site activities [ON-SITE]	Combination of methods	E06 E11 G01 G03 G04 G05	0.1	2.5	N	-	-	
Progress test [ON-SITE]	Assessment tests	E03 E06 E11 G01 G03 G04	0.02	0.5	Υ	N	N	
Final test [ON-SITE]	Assessment tests	E06 E11 G01 G03 G04	0.08	2	Υ	Υ	Υ	
Total:			4.5	112.5				
Total credits of in-class work: 1.7			Total class time hours: 42.5					
Total credits of out of class work: 2.8				Total hours of out of class work: 70				

As: Assessable training activity

Com: Training activity of compulsory overcoming

R: Rescheduling training activity

8. Evaluation criteria and Grading System							
	Grading System						
Evaluation System	Face-to-Face	Self-Study Student	Description				
Assessment of active participation	10.00%	0.00%	The active attitude of the student will be assessed in the classroom.				
Fieldwork assessment	30.00%	0.00%	At the begining of the course working groups will be created and they will develop a project along the course. These projects will be supervised by the teacher and may need to be exposed at the end of the course.				
Assessment of problem solving and/or case studies	10.00%	0.00%	The teacher will provide the student some tasks which will have to be solved and delivered at the end of each theme.				
Progress Tests	10.00%	0.00%	The teacher will provide the student some tasks which will have to be solved and delivered at the end of each theme.				
Final test	140 00% 10 00%		The teacher will provide the student some tasks which will hav to be solved and delivered at the end of each theme.				
Total	100.00%	0.00%					

## Evaluation criteria for the final exam:

The final test may be replaced by increasing the weight of the part corresponding to the resolution of problems or cases

## Specifications for the resit/retake exam:

The student can only recover the qualifications of group work and problem solving (handing it over again according to teacher recommendations) and final test (exam). Qualifications of the other sections will be retained but without possibility of recovery
