

1. General information

Course: WATER RESOURCES SYSTEM MANAGEMENT

Type: CORE COURSE

Degree: 2343 - MASTERS DEGREE PROGRAMME IN ENGINEERING OF ROADS, CANALS AND PORTS

Center: 603 - E.T.S. CIVIL ENGINEERS OF CR

Year: 1

Main language: English

Use of additional languages:

Web site:

Code: 310808

ECTS credits: 4.5

Academic year: 2020-21

Group(s): 20

Duration: C2

Second language: English

English Friendly: N

Bilingual: N

Lecturer: JAVIER GONZALEZ PEREZ - Group(s): 20				
Building/Office	Department	Phone number	Email	Office hours
A38	INGENIERÍA CIVIL Y DE LA EDIFICACIÓN	926295422	javier.gonzalez@uclm.es	Se fijará al inicio del curso
Lecturer: SAMUEL MORALEDA LUDENA - Group(s): 20				
Building/Office	Department	Phone number	Email	Office hours
	INGENIERÍA CIVIL Y DE LA EDIFICACIÓN	3818	samuel.moraleda@uclm.es	Se fijará al inicio del curso

2. Pre-Requisites

Numerical Analysis

Hydrologic Engineering

3. Justification in the curriculum, relation to other subjects and to the profession

The student will reach the knowledge and skills for the management of water resources, the related Spanish and European legislation, the modeling and simulation techniques of systems, and the tools for optimization and support for decision making that can be used.

4. Degree competences achieved in this course

Course competences	
Code	Description
G01	Scientific-technical and methodological capacity for the continuous recycling of knowledge and the exercise of the professional functions of consultancy, analysis, design, calculation, project, planning, leadership, management, construction, maintenance, conservation and exploitation in the fields of civil engineering.
G03	Knowledge, understanding and ability to apply the necessary legislation in the exercise of the profession of Civil Engineer.
G09	Capacity to plan and manage water and energy resources, including the management of the integrated water cycle.
G27	Ability to communicate in a second language.
TE05	Ability to calculate, evaluate, plan and regulate surface and groundwater resources.

5. Objectives or Learning Outcomes

Course learning outcomes	
Description	
Students are familiar with the usual orders of magnitude, sources of information and scales of work in water resources planning and management.	
Students can model a water resources system, in its surface and underground components, with the purpose of its use for a set of demands and restrictions, seeking their fulfillment in a sustainable way with the preservation of good environmental conditions.	
Students know the regulatory framework and technical recommendations, both national and international.	
Students can numerically analyze the behavior of these systems and the implementation of optimization techniques as decision support tools.	
Students know the environmental implications of water resources development.	

6. Units / Contents

- Unit 1: Legislation framework
Unit 2: Hydrologic Scenarios
Unit 3: Water Resources Management
Unit 4: Decision Support Techniques
Unit 5: Hydrologic extremes: Flood and Droughts

7. Activities, Units/Modules and Methodology

Training Activity	Methodology	Related Competences (only degrees before RD 822/2021)	ECTS	Hours	As	Com	Description
Class Attendance (theory) [ON-SITE]	Lectures	G01 G03 G09 G27 TE05	0.8	20	N	-	
Project or Topic Presentations [ON-SITE]	project-based learning	G01 G03 G09 G27 TE05	0.24	6	Y	Y	
Workshops or seminars [ON-SITE]	project-based learning	G01 G03 G09 G27 TE05	0.31	7.75	N	-	
Study and Exam Preparation [OFF-SITE]	Self-study	G01 G03 G09 G27 TE05	1.12	28	Y	Y	
Writing of reports or projects [OFF-SITE]	project-based learning	G01 G03 G09 G27 TE05	2.03	50.75	Y	Y	
Total:			4.5	112.5			
Total credits of in-class work: 1.35			Total class time hours: 33.75				
Total credits of out of class work: 3.15			Total hours of out of class work: 78.75				

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

8. Evaluation criteria and Grading System

Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Assessment of active participation	10.00%	0.00%	
Final test	40.00%	40.00%	Written exam
Theoretical papers assessment	40.00%	40.00%	Homeworks
Oral presentations assessment	10.00%	10.00%	Homework oral presentations
Oral presentations assessment	0.00%	10.00%	Oral presentation of a scientific paper related with the subject
Total:	100.00%	100.00%	

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

Evaluation criteria for the final exam:

Continuous assessment:

- Exam must be passed.
Global Project and Home Works Scores must be passed.

Non-continuous evaluation:

- Exam must be passed.
Global Project and Home Works Scores must be passed.

Specifications for the resit/retake exam:

- Project and Home Works Scores keep in the extraordinary call.
Exam score does not keep of the extraordinary call.

9. Assignments, course calendar and important dates

Not related to the syllabus/contents	
Hours	hours
Unit 1 (de 5): Legislation framework	
Activities	Hours
Class Attendance (theory) [PRESENCIAL][Lectures]	12
Study and Exam Preparation [AUTÓNOMA][Self-study]	24
Unit 2 (de 5): Hydrologic Scenarios	
Activities	Hours
Class Attendance (theory) [PRESENCIAL][Lectures]	4
Writing of reports or projects [AUTÓNOMA][project-based learning]	15
Unit 3 (de 5): Water Resources Management	

Activities		Hours
Class Attendance (theory) [PRESENCIAL][Lectures]		4
Writing of reports or projects [AUTÓNOMA][project-based learning]		15
Unit 4 (de 5): Decision Support Techniques		
Activities		Hours
Class Attendance (theory) [PRESENCIAL][Lectures]		4
Project or Topic Presentations [PRESENCIAL][project-based learning]		3
Workshops or seminars [PRESENCIAL][project-based learning]		2.75
Writing of reports or projects [AUTÓNOMA][project-based learning]		24.75
Unit 5 (de 5): Hydrologic extremes: Flood and Droughts		
Activities		Hours
Class Attendance (theory) [PRESENCIAL][Lectures]		4
Global activity		
Activities		hours
Project or Topic Presentations [PRESENCIAL][project-based learning]		3
Workshops or seminars [PRESENCIAL][project-based learning]		2.75
Study and Exam Preparation [AUTÓNOMA][Self-study]		24
Writing of reports or projects [AUTÓNOMA][project-based learning]		54.75
Class Attendance (theory) [PRESENCIAL][Lectures]		28
		Total horas: 112.5
