

**1. General information****Course:** ARTWORK I**Type:** BASIC**Degree:** 315 - UNDERGRADUATE DEGREE IN BUILDING ENGINEERING**Center:** 308 - SCHOOL POLYTECHNIC OF CUENCA**Year:** 2**Main language:** Spanish**Use of additional languages:****Web site:****Code:** 59311**ECTS credits:** 6**Academic year:** 2020-21**Group(s):** 30**Duration:** First semester**Second language:****English Friendly:** Y**Bilingual:** N**Lecturer:** VICTOR JOSE PEREZ ANDREU - Group(s): 30

Building/Office	Department	Phone number	Email	Office hours
Escuela Politécnica de Cuenca/Despacho 1.11	INGENIERÍA CIVIL Y DE LA EDIFICACIÓN	4810	victor.perez@uclm.es	The tutorials will be published at the beginning of the course, on the Virtual Campus and at the door of office 1.11

**2. Pre-Requisites**

Recommended to have passed the first year courses.

**3. Justification in the curriculum, relation to other subjects and to the profession****RELATIONSHIP WITH THE PROFESSION**

The object of the subject is the learning of architectural technical drawing, being a fundamental means of communication between the different agents involved in the building processes. The subject corresponds to the learning of the technical graphic language that allows to communicate and document, in an efficient way, the spatial, geometric, dimensional and functional characteristics of the architectural and constructive elements that make up the buildings. The ability to interpret and generate architectural technical drawings is essential in the training and professional practice of building engineers.

The subject trains the student to take geometric, dimensional and material data of architectural constructions for documentation. To do this, "in situ" surveys of buildings are made by drawing a freehand sketch, using photography and measuring methods. With the information obtained, the corresponding architectural models are defined and the drawings, plans and necessary information are obtained.

**RELATIONSHIP WITH OTHER SUBJECTS OF THE STUDY PLAN**

The learning of the subject requires the ability of visualization and spatial representation that develops in the subject in the first year.

Drawing I provides the student with the necessary skills to express and document the studies and geometrical, spatial and dimensional analysis of buildings, which are necessary for the learning of later subjects in the curriculum. This subject completes the basic training of the subject Graphic Expression, foreseen in the plan, and is complemented in a specific way with the learning of Drawing II, Topography, Technical Projects and Advanced Drawing, during later courses.

**4. Degree competences achieved in this course****Course competences**

Code	Description
E03	Ability to apply the spatial representation systems, the sketch development, proportionality, language and graphical representation techniques of the elements and constructive processes.
G01	Ability for analysis and synthesis
G03	Ability to manage information
G04	Problem resolution
G05	Decision making
G07	Teamwork
G12	Autonomous learning
G19	Motivation for quality
G22	Correct oral and written communication

**5. Objectives or Learning Outcomes****Course learning outcomes****Description**

Know and know how to use the direct graphic techniques or autographs used in the productions of the graphic representation of architectural application.

Know and know how to use the different modes of presentation that characterize each of the graphical languages of architectural application.

**Additional outcomes**

Train in the use of integrated information technology in BIM contexts for the production and management of digital information models and architectural graphic documentation.

Use basic tools for the documentation and measurement of the dimensions of buildings and building elements.

## 6. Units / Contents

### Unit 1: DRAWING AND ARCHITECTURAL MODELING

- Unit 1.1** Graphic documentation of the building processes.
- Unit 1.2** Architectural representation by manual means and autographs
- Unit 1.3** Digital architectural modeling
- Unit 1.4** Drawing architectural plans.

### Unit 2: GRAPHIC DOCUMENTATION OF EXISTING BUILDINGS

- Unit 2.1** Study, representation and techniques for existing buildings documentation
- Unit 2.2** Freehand architectural drawing: techniques and purposes
- Unit 2.3** Architectural modeling
- Unit 2.4** Information Management: interoperabilidad, archiving and tracing

### Unit 3: ARCHITECTURAL DOCUMENTATION WORKSHOP

- Unit 3.1** Data collection of existing building
- Unit 3.2** Realization of BIM architectural model
- Unit 3.3** Configuration and layout of technical drawings of an architectural model
- Unit 3.4** Architectural presentation of existing building

## 7. Activities, Units/Modules and Methodology

Training Activity	Methodology	Related Competences (only degrees before RD 822/2021)	ECTS	Hours	As	Com	Description
Class Attendance (theory) [ON-SITE]	Lectures	G01 G03 G22	0.32	8	N	-	
Class Attendance (practical) [ON-SITE]	Problem solving and exercises	G01 G03 G04 G05	0.64	16	N	-	
Other on-site activities [ON-SITE]	Guided or supervised work	G01 G03 G04 G05 G07 G12 G19 G22	0.96	24	Y	Y	
Other on-site activities [ON-SITE]	Assessment tests	G01 G03 G04 G05 G07 G12 G19 G22	0.32	8	Y	Y	
Individual tutoring sessions [ON-SITE]	Guided or supervised work	G01 G03 G04 G05 G07 G12 G19 G22	0.12	3	N	-	
Project or Topic Presentations [ON-SITE]	Individual presentation of projects and reports	G01 G03 G07 G19 G22	0.04	1	Y	Y	
Study and Exam Preparation [OFF-SITE]	Other Methodologies	G01 G03 G12 G19 G22	1	25	N	-	
Writing of reports or projects [OFF-SITE]	Self-study	G01 G03 G04 G05 G07 G12 G19 G22	2.6	65	Y	Y	
<b>Total:</b>			<b>6</b>	<b>150</b>			
<b>Total credits of in-class work: 2.4</b>			<b>Total class time hours: 60</b>				
<b>Total credits of out of class work: 3.6</b>			<b>Total hours of out of class work: 90</b>				

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

## 8. Evaluation criteria and Grading System

Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Practicum and practical activities reports assessment	20.00%	20.00%	Tutored practical exercises in the classroom or in the field
Test	20.00%	20.00%	Performing partial evaluation exercises
Oral presentations assessment	10.00%	10.00%	Presentation and defense of individual or group work
Projects	50.00%	50.00%	Autonomous work
<b>Total:</b>	<b>100.00%</b>	<b>100.00%</b>	

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

### Evaluation criteria for the final exam:

#### Continuous assessment:

The grade of the subject is calculated by means of the weighted sum of all the evaluable activities: resolution of exercises in class, tests, work and defense of the same.

#### Non-continuous evaluation:

The grade of the subject is calculated by means of the weighted sum of all the evaluable activities: resolution of exercises in class, tests, work and defense of the same.

### Specifications for the resit/retake exam:

- 50% Completion of monographic work
- 10% Defense of work
- 20% Resolution of architectural sketch drawing exercises
- 20% Resolution of architectural computer aided drawing drawings

### Specifications for the second resit / retake exam:

- 50% Completion of monographic work
- 10% Defense of work

20% Resolution of architectural sketch drawing exercises  
20% Resolution of architectural computer aided drawing drawings
