IN MECHANICAL ENGINEERING (ALM)**Center:** 106 - SCHOOL OF MINING AND INDUSTRIAL ENGINEERING**Year:** 2**Main language:** Spanish**Use of additional languages:****Web site:** campusvirtual.uclm.es**Code:** 56310**ECTS credits:** 6**Academic year:** 2020-21**Group(s):** 56**Duration:** First semester**Second language:** English**English Friendly:** Y**Bilingual:** N**Lecturer:** XIAOXIN ZHANG --- - Group(s): 56

Building/Office	Department	Phone number	Email	Office hours
Politécnico/2-A54	MECÁNICA ADA. E ING. PROYECTOS	926052870	Xiaoxin.Zhang@uclm.es	Published in the beginning of the semester.

**2. Pre-Requisites**

Knowledge on mathematics, mechanics and graphic expression.

**3. Justification in the curriculum, relation to other subjects and to the profession**

The Resolución of 15 January of 2009, BOE of 29 January (Orden CIN / 351/2009, 9 February, BOE of 20 February 2009) establishes the requirements that must meet the new degree titles so that habilitate in the exercise of the profession of Technical Industrial Engineer.

It is a common subject of the specialty of Mechanical Engineering in which students are initiated in the study of elastic solids. The knowledge in resistance of materials is provided so that the student obtains the foundations and applications in the analysis of stresses and strains of structural components subjected to constant fixed loads over time. The training in the following course will be completed with the subject "Mechanics of deformable solids".

**4. Degree competences achieved in this course****Course competences**

Code	Description
A01	To understand and have knowledge in an area of study that moves on from the general education attained at secondary level and usually found at a level that, while supported in advanced text books, also includes some aspects that include knowledge found at the cutting edge of the field of study.
A02	To know how to apply knowledge to work or vocation in a professional manner and possess the competences that are usually demonstrated by the formulation and defence of arguments and the resolution of problems in the field of study.
A04	To be able to transmit information, ideas, problems and solutions to a specialized audience.
A07	Knowledge of Information Technology and Communication (ITC).
A08	Appropriate level of oral and written communication.
A09	Ethical and professional commitment.
A12	Knowledge of basic materials and technologies that assist the learning of new methods and theories and enable versatility to adapt to new situations.
A13	Ability to take the initiative to solve problems, take decisions, creativity, critical reasoning and ability to communicate and transmit knowledge, skills and abilities in Mechanical Engineering.
C08	Knowledge and use of the principles of the resistance of materials.
CB01	Prove that they have acquired and understood knowledge in a subject area that derives from general secondary education and is appropriate to a level based on advanced course books, and includes updated and cutting-edge aspects of their field of knowledge.
CB02	Apply their knowledge to their job or vocation in a professional manner and show that they have the competences to construct and justify arguments and solve problems within their subject area.
CB03	Be able to gather and process relevant information (usually within their subject area) to give opinions, including reflections on relevant social, scientific or ethical issues.
CB04	Transmit information, ideas, problems and solutions for both specialist and non-specialist audiences.
CB05	Have developed the necessary learning abilities to carry on studying autonomously
D04	Knowledge and ability to apply the fundamentals of elasticity and resistance of materials to the behaviour of real solids.

**5. Objectives or Learning Outcomes****Course learning outcomes**

Description

Manual techniques for calculating displacement and strengths in structural elements

To know when a solid can be studied through geometrical and material simplifications

Calculate the distribution of tensions in a section

Apply basic knowledge of elasticity and resistance of materials to real solids

Measure simple structural elements

**6. Units / Contents****Unit 1: One dimensional solids with elastic behavior. Geometrical hypotheses and materials.**

**Unit 1.1** Introduction to the resistance of materials: The elastic solid, external loads, static equilibrium, supports, reactions, internal stresses, tensions and deformations.

**Unit 2: Calculation of efforts in structural elements. Calculation of stress distribution in the section.**

**Unit 2.1** Traction and compression: actions, tensions, deformations and hyperstatic systems.

**Unit 2.2** Shear: Elementary theory of shear, stress, strain, deformation and mechanical components of shear.

**Unit 2.3** Bending: Types of beams subject to bending, types of bending, stresses, strains, deformations and hyperstatic systems.

**Unit 2.4** Buckling: Instability, Euler's formula, slenderness, coefficient  $w$  and buckling in composed bending.

**Unit 2.5** Torsion: Simple torsion, actions, stresses, deformations, hyperstatic systems and combined efforts.

**Unit 3: Application of the acquired knowledge to the calculation and verification of structural elements.**

**Unit 3.1** Analysis of simple structures: Typology of structures, resolution methods and structural analysis programs.

**7. Activities, Units/Modules and Methodology**

Training Activity	Methodology	Related Competences (only degrees before RD 822/2021)	ECTS	Hours	As	Com	Description
Class Attendance (theory) [ON-SITE]	Lectures	A01 A02 A04 A07 A08 A09 A12 A13 C08 CB01 CB02 CB03 CB04 CB05 D04	0.8	20	N		The teacher will focus on the topic and the fundamental contents of the subject, using a blackboard, audiovisual media and academic experiences.
Problem solving and/or case studies [ON-SITE]	Problem solving and exercises	A01 A02 A04 A07 A08 A09 A12 A13 C08 CB01 CB02 CB03 CB04 CB05 D04	0.4	10	N		The teacher will carry out exercises and practical problems related to the corresponding topic.
Laboratory practice or sessions [ON-SITE]	Practical or hands-on activities	A01 A02 A04 A07 A08 A09 A12 A13 C08 CB01 CB02 CB03 CB04 CB05 D04	0.48	12	Y	N	Resolution of individual or small group laboratory practices.
Workshops or seminars [ON-SITE]	Case Studies	A01 A02 A04 A07 A08 A09 A12 A13 C08 CB01 CB02 CB03 CB04 CB05 D04	0.4	10	Y	N	Solving problems and / or works proposed by the teacher.
Individual tutoring sessions [ON-SITE]	Combination of methods	A01 A02 A04 A07 A08 A09 A12 A13 C08 CB01 CB02 CB03 CB04 CB05 D04	0.16	4	N		Individual and group tutoring space for the subject work.
Progress test [ON-SITE]	Assessment tests	A01 A02 A04 A07 A08 A09 A12 A13 C08 CB01 CB02 CB03 CB04 CB05 D04	0.16	4	Y	N	They will consist of two tests related to aspects of the theoretical-practical application.
Study and Exam Preparation [OFF-SITE]	Self-study	A01 A02 A04 A07 A08 A09 A12 A13 C08 CB01 CB02 CB03 CB04 CB05 D04	3.6	90	N		
<b>Total:</b>			<b>6</b>	<b>150</b>			
<b>Total credits of in-class work: 2.4</b>			<b>Total class time hours: 60</b>				
<b>Total credits of out of class work: 3.6</b>			<b>Total hours of out of class work: 90</b>				

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

**8. Evaluation criteria and Grading System**

Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Theoretical papers assessment	30.00%	30.00%	The reports of seminars, problems and / or papers presented as well as the attitude shown by the student will be evaluated.
Progress Tests	70.00%	0.00%	Two tests related with the application of theoretical-practical aspects. Each test must be passed at least 4 out of 10.
Final test	0.00%	70.00%	It will consist of a test that encompasses all the topics of the subject (final exam).
<b>Total:</b>	<b>100.00%</b>	<b>100.00%</b>	

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

**Evaluation criteria for the final exam:****Continuous assessment:**

The subject will be passed with a score equal to or greater than 5.

For those students who followed the evaluation process described above, the grades obtained are maintained.

**Non-continuous evaluation:**

The subject will be passed with a score equal to or greater than 5.

**Specifications for the resit/retake exam:**

The subject will be passed with a score equal to or greater than 5.

For those students who followed the evaluation process described above, the grades obtained are maintained.

**Specifications for the second resit / retake exam:**

The subject will be passed with a score equal to or greater than 5.
