

1. General information

Course: DATA STRUCTURES

Type: CORE COURSE

Degree: 347 - DEGREE PROGRAMME IN COMPUTER SCIENCE ENGINEERING (CR)

Center: 108 - SCHOOL OF COMPUTER SCIENCE OF C. REAL

Year: 2

Main language: English

Use of additional languages:

Web site:

Code: 42312

ECTS credits: 6

Academic year: 2020-21

Group(s): 20 21 22

Duration: First semester

Second language: Spanish

English Friendly: N

Bilingual: Y

Lecturer: CRESCENCIO BRAVO SANTOS - Group(s): 21

Building/Office	Department	Phone number	Email	Office hours
Fermin Caballero / Mod.A 1.03	TECNOLOGÍAS Y SISTEMAS DE INFORMACIÓN	926052090	crescencio.bravo@uclm.es	Available at https://esi.uclm.es/categorias/profesorado-y-tutorias?locale=en

Lecturer: EDUARDO FERNANDEZ MEDINA PATON - Group(s): 22

Building/Office	Department	Phone number	Email	Office hours
3.24	TECNOLOGÍAS Y SISTEMAS DE INFORMACIÓN	926295485	eduardo.fdezmedina@uclm.es	Available at https://esi.uclm.es/categorias/profesorado-y-tutorias?locale=en

Lecturer: JESUS FONTECHA DIEZMA - Group(s): 20

Building/Office	Department	Phone number	Email	Office hours
Fermin Caballero/3.30	TECNOLOGÍAS Y SISTEMAS DE INFORMACIÓN	926052515	jesus.fontecha@uclm.es	Available at https://esi.uclm.es/categorias/profesorado-y-tutorias?locale=en

Lecturer: ANTONIO SANTOS-OLMO PARRA - Group(s): 21

Building/Office	Department	Phone number	Email	Office hours
Fermin Caballero / 2.19	TECNOLOGÍAS Y SISTEMAS DE INFORMACIÓN		antonio.santosolmo@uclm.es	Available at https://esi.uclm.es/categorias/profesorado-y-tutorias?locale=en

2. Pre-Requisites

Basic knowledge of maths: Logic, Functions theory, Algebraic structure, a minimum of abstraction capability and mathematical expression. It is enough to have passed the subjects of "Algebra" and "Cálculo".

Basic knowledge of Java programming language, fundamentals of information systems and development environments. It is enough to have passed the subjects **Programming Fundamentals** (I & II) and **Sistemas de Información**.

It is recommended the student is studying: **Lógica** (1st semester) and **Programming methodology** (2nd semester).

3. Justification in the curriculum, relation to other subjects and to the profession

Data structures belongs to the subject of Programming, and is part of the **Común a la Rama de Informática** module from **Grado en Ingeniería Informática**

This subject could be seen as a continuation of **Programming Fundamentals II**, studying new data structures from new viewpoints, in addition to its use, formal definition and implementation; with the advantage of adding the implemented data structures as external libraries.

Furthermore, **Programming methodology** could be seen as a continuation of this subject, in which each algorithmic scheme might have an immediate application on new data structures (ordering of lineal structures, greedy explorations or tree dynamics, optimal routes in graphs, etc.). Also, in the subject **Programación declarativa** (intensificación de **Computación**), apart from being required certain acquired knowledge (lists, recursive techniques, etc.), it will be deepened in the definition of all previously learned data structures taking into account important features related to efficiency and optimization (inheritance, higher order, infinite structures, ...).

Finally, during all these studies and also in the professional life, software apps should be implemented making use of complex data structures. Programming language provide appropriate structures (lists, queues, etc.). The detailed analysis of these data structures is important to understand their working. In other cases, languages do not provide them (e.g. trees and graphs), and we need to add them. On the other hand, the use of data structures from a design and analysis viewpoint provide us a proper abstraction level and will boost our programming skills (recursion, modularization, etc.), which are needed in software development.

4. Degree competences achieved in this course

Course competences

Code	Description
BA04	Basic knowledge about the uses and programming of computers, operating systems, data bases, and digital programmes with applications in engineering.
CO06	Knowledge and application of basic algorithms in digital technologies for the development of solutions, analysing their appropriateness

CO07	and complexity. Knowledge, design, and efficient use of types of data and structures which arise as most appropriate in problem solving.
CO08	Ability to analyse, design, build and maintain applications in a strong, safe, and efficient manner by selecting the most appropriate paradigms and programming languages.
INS01	Analysis, synthesis, and assessment skills.
INS04	Problem solving skills by the application of engineering techniques.
PER01	Team work abilities.
PER02	Ability to work in multidisciplinary teams.
PER04	Interpersonal relationship skills.
PER05	Acknowledgement of human diversity, equal rights, and cultural variety.
SIS01	Critical thinking.
SIS03	Autonomous learning.
UCLM02	Ability to use Information and Communication Technologies.

5. Objectives or Learning Outcomes

Course learning outcomes

Description

Ability to manage types of data, data structures, and abstract types of data in an appropriate manner regarding their problems, as well as their formal specifications, implementations, and use of abstract types of lineal and non-linear data

6. Units / Contents

Unit 1: General concepts

Unit 2: Stacks

Unit 3: Queues

Unit 4: Lists

Unit 5: Graphs

Unit 6: Trees

ADDITIONAL COMMENTS, REMARKS

In laboratory sessions, practical exercises with linear and non-linear data structures will be done.

7. Activities, Units/Modules and Methodology

Training Activity	Methodology	Related Competences (only degrees before RD 822/2021)	ECTS	Hours	As	Com	Description
Class Attendance (theory) [ON-SITE]	Lectures	BA04 CO06 CO07 CO08	0.72	18	N	-	Teaching of the subject matter by lecturer (MAG)
Individual tutoring sessions [ON-SITE]		BA04 CO06 CO07 CO08 UCLM02	0.18	4.5	N	-	Individual or small group tutoring in lecturer's office, classroom or laboratory (TUT)
Study and Exam Preparation [OFF-SITE]	Self-study	BA04 CO06 CO07 CO08 SIS01 SIS03	2.1	52.5	N	-	Self-study (EST)
Other off-site activity [OFF-SITE]	Practical or hands-on activities	BA04 CO06 CO07 CO08 INS01 INS04 PER01 PER02 PER04 PER05 SIS03	0.6	15	N	-	Lab practical preparation (PLAB)
Problem solving and/or case studies [ON-SITE]	Problem solving and exercises	BA04 CO06 CO07 CO08 PER01 PER02 PER04 PER05 SIS01 SIS03 UCLM02	0.6	15	Y	N	Worked example problems and cases resolution by the lecturer and the students (PRO)
Writing of reports or projects [OFF-SITE]	Self-study	BA04 CO06 CO07 CO08 INS01 INS04 PER01 PER02 PER04 PER05 SIS03	0.9	22.5	Y	N	Preparation of essays on topics proposed by lecturer (RES)
Laboratory practice or sessions [ON-SITE]	Practical or hands-on activities	BA04 CO06 CO07 CO08 INS04 PER01 PER02 PER04 PER05	0.6	15	Y	Y	Realization of practicals in laboratory /computing room (LAB)
Final test [ON-SITE]	Assessment tests	BA04 CO06 CO07 CO08 INS01 INS04	0.3	7.5	Y	Y	Final test of the complete syllabus of the subject (EVA)
Total:			6	150			
Total credits of in-class work: 2.4			Total class time hours: 60				
Total credits of out of class work: 3.6			Total hours of out of class work: 90				

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

8. Evaluation criteria and Grading System

Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Final test	50.00%	50.00%	Compulsory activity that can be retaken (rescheduling) to be carried out within the planned exam dates of the final exam call

Theoretical papers assessment	15.00%	15.00%	(convocatoria ordinaria) Non-compulsory activity that can be retaken. To be carried out before end of teaching period
Assessment of active participation	10.00%	10.00%	Non-compulsory activity that can be retaken. To be carried out during the theory/lab sessions in the case of continuous evaluation students. The non-continuous evaluation students will have an alternative evaluation system for this activity to be carried out within the planned exam dates of the final exam call (convocatoria ordinaria)
Laboratory sessions	25.00%	25.00%	Compulsory activity that can be retaken. To be carried out during lab sessions
Total:	100.00%	100.00%	

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

Evaluation criteria for the final exam:

Continuous assessment:

In compulsory activities, a minimum mark of 40% is required in order to pass that activity and have the possibility to therefore pass the entire subject. The evaluation of the activities will be global and therefore must be quantified by means of a single mark. If the activity consists of several sections, each section may be evaluated separately provided students are informed in writing of this evaluation criterion at the beginning of the academic year. In the case of the activities that may be retaken (i.e., rescheduling), an alternative activity or test will be offered in the resit/retake exam call (convocatoria extraordinaria).

The final exam will be common for all the theory/laboratory groups of the subject and will be evaluated by the lecturers of the subject in a serial way, i.e., each part of the final exam will be evaluated by the same lecturer for all the students.

A student is considered to pass the subject if she/he obtains a minimum of 50 points out of 100, taking into account the points obtained in all the evaluable activities, and also has passed all the compulsory activities.

For students who do not pass the subject in the final exam call (convocatoria ordinaria), the marks of activities already passed will be conserved for the resit/retake exam call (convocatoria extraordinaria). In the case of the passed recoverable activities, the student will have the opportunity to receive an alternative evaluation of those activities in the resit/retake exam call and, in that case, the final grade of the activity will correspond to the latter grade obtained.

The mark of the passed activities in any call, except for the final exam, will be conserved for the subsequent academic year at the request of the student, provided that mark is equal or greater than 50% and that the activities and evaluation criteria of the subject remain unchanged prior to the beginning of that academic year.

The failure of a student to attend the final exam will automatically result in her/him receiving a "Failure to attend" (no presentado). If the student has not passed any compulsory evaluation activity, the maximum final grade will be 40%

Non-continuous evaluation:

Students who are unable to attend training activities on a regular basis may apply at the beginning of the semester for the non-continuous assessment mode. Similarly, if a student who is undergoing continuous assessment incurs any circumstance that prevents her/him from regularly attending the classroom-based training activities, she/he may renounce the accumulated mark in continuous assessment and apply for the non-continuous assessment mode. In this case, a notification by the student must be given before the date scheduled for the tests in the ordinary call, in accordance with a deadline that will be informed at the beginning of the semester.

Students who take the non-continuous assessment mode will be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences), through the assessment systems indicated in the column "Non-continuous assessment".

In the "non-continuous assessment" mode, it is not compulsory to keep the mark obtained by the student in the activities or tests (progress test or partial test) taken in the continuous assessment mode.

Specifications for the resit/retake exam:

Evaluation tests will be conducted for all recoverable activities

Specifications for the second resit / retake exam:

Same characteristics as the resit/retake exam call

9. Assignments, course calendar and important dates	
Not related to the syllabus/contents	
Hours	hours
Individual tutoring sessions [PRESENCIAL]	4.5
Study and Exam Preparation [AUTÓNOMA][Self-study]	52.5
Other off-site activity [AUTÓNOMA][Practical or hands-on activities]	15
Writing of reports or projects [AUTÓNOMA][Self-study]	22.5
Laboratory practice or sessions [PRESENCIAL][Practical or hands-on activities]	15
Final test [PRESENCIAL][Assessment tests]	7.5
General comments about the planning: The subject is taught in 3 x 1,5 hour sessions per week	
Unit 1 (de 6): General concepts	
Activities	Hours
Class Attendance (theory) [PRESENCIAL][Lectures]	3
Problem solving and/or case studies [PRESENCIAL][Problem solving and exercises]	1.5
Unit 2 (de 6): Stacks
