Sabatini/01	CIENCIA Y TECNOLOGÍA AGROFORESTAL Y GENÉTICA	925 268 800	isabel.margudo@uclm.es	Monday, tuesday, wednesday 12.00-14.00h

2. Pre-Requisites

Not established

3. Justification in the curriculum, relation to other subjects and to the profession

The course will introduce basic genetics concepts and will show the central role of genetics in biology.

The content is related with other courses as: Gene expression (year 2), Genetic Engineering (year 3) and Molecular Pathology (year 3).

Genetic knowledge is basic to professional areas as basic research and molecular diagnosis of genetic human diseases.

4. Degree competences achieved in this course**Course competences**

Code	Description
E01	Express themselves correctly in basic biological, physical, chemical, mathematical and computer terms.
E02	Work properly and quality driven in a chemical, biological and biochemical laboratory, including safety, handling and disposal of waste and keeping a record of activities.
E05	Acquire, develop and apply the main techniques for the preparation and observation of biological samples and identify and describe the different organs, tissues and animal and plant cells in the different types of preparations.
E07	To know the structure of genes and the mechanisms of DNA replication, recombination and repair in the context of the functioning of cells and organisms, as well as the basis of heredity and genetic and epigenetic variation between individuals.
E08	Analyze and interpret results derived from the realization of animal and/or plant karyotypes, chromosome bands and practical genetic problems.
E09	Be familiar with the different cell types (prokaryotes and eukaryotes) at the level of structure, physiology and biochemistry and be able to critically explain how their properties are adapted to their biological function.
E12	Have the numerical and computational skills to apply mathematical procedures for data analysis.
G01	To possess and understand the knowledge in the area of Biochemistry and Molecular Biology at a level that, based on advanced textbooks, also includes cutting-edge aspects of relevance in the discipline
G02	To know how to apply the knowledge of Biochemistry and Molecular Biology to professional practice and to possess the necessary intellectual skills and abilities for this practice, including the capacity for: information management, analysis and synthesis, problem solving, organization and planning and generation of new ideas.
G03	Be able to collect and interpret relevant data, information and results, draw conclusions and issue reasoned reports on relevant social, scientific or ethical issues in connection with advances in Biochemistry and Molecular Biology.
G04	To know how to transmit information, ideas, problems and solutions in the field of Biochemistry and Molecular Biology to a specialized and non-specialized public.
T01	Proficiency in a second foreign language, preferably English, at level B1 of the Common European Framework of Reference for Languages
T02	User-level knowledge of Information and Communication Technologies (ICT).
T03	A correct oral and written communication
T05	Organizational and planning skills

5. Objectives or Learning Outcomes**Course learning outcomes**

Description

To know the applications of genetics to human biology.
 Master the basic terminology of genetics.
 To know the mechanisms of modification of the genetic material.
 To know the relationship between structure and function of nucleic acids
 Understand clearly the mechanisms of heredity
 Understand the fundamental role of genetics in the evolution of living beings.
 To know the structural bases of the interactions between macromolecules
 Be able to correctly express the concepts and principles of heredity
 Understanding how a genetic analysis is performed

6. Units / Contents

Unit 1: Introduction

Unit 1.1 Genetics as a science

Unit 2: Inheritance

Unit 2.1 Chromosomal basis of inheritance

Unit 2.2 Sex determination. Sex linked inheritance

Unit 2.3 Inheritance in humans

Unit 2.4 Gene interaction

Unit 2.5 Environment and genes

Unit 2.6 Linkage and recombination in eukaryotes

Unit 3: Molecular basis of inheritance

Unit 3.1 Nature and structure of the hereditary material

Unit 3.2 Organization and replication of genetic material

Unit 3.3 Molecular biology of gene function. Transcription. Genetic code and translation

Unit 3.4 Gene mutation. Genetic analysis

Unit 3.5 Chromosome mutation

Unit 4: Population genetics and evolution

Unit 4.1 Quantitative genetics. Heritability

Unit 4.2 Genetic structure of populations

Unit 4.3 Changes in allelic frequencies. Mutation, migration, genetic drift and selection

Unit 4.4 Speciation and evolution. Molecular evolution

Unit 5: Practical contents

Unit 5.1 Genetic mapping. Sex linkage inheritance.

Unit 5.2 Inheritance in humans

Unit 5.3 Electrophoresis of DNA

Unit 5.4 Epistasis

7. Activities, Units/Modules and Methodology

Training Activity	Methodology	Related Competences (only degrees before RD 822/2021)	ECTS	Hours	As	Com	Description
Class Attendance (theory) [ON-SITE]	Lectures	E07 E08 G01	1.32	33	N	-	
Problem solving and/or case studies [ON-SITE]	Combination of methods	E01 E08 E09 E12 G03 G04	0.32	8	Y	N	
Other off-site activity [OFF-SITE]	Project/Problem Based Learning (PBL)	E01 E08 E12 G03	0.6	15	Y	N	
Laboratory practice or sessions [ON-SITE]	Practical or hands-on activities	E01 E02 E05 E08 E09 E12 G02 G03	0.6	15	Y	Y	
Progress test [ON-SITE]	Assessment tests	E01 E07 E12 G01 G03	0.04	1	Y	N	
Final test [ON-SITE]	Assessment tests	E01 E02 E05 E07 E08 E09 E12 G01 G02 G03 G04	0.12	3	Y	Y	
Study and Exam Preparation [OFF-SITE]	Self-study	E01 E07 E08 E09 E12 G01	3	75	N	-	
Total:			6	150			
Total credits of in-class work: 2.4			Total class time hours: 60				
Total credits of out of class work: 3.6			Total hours of out of class work: 90				

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

8. Evaluation criteria and Grading System

Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Laboratory sessions	15.00%	15.00%	Assistance is compulsory. Evaluation would be through a questionnaire. It is compulsory to obtain a 4/10
Assessment of problem solving and/or case studies	10.00%	0.00%	Not mandatory.
Progress Tests	10.00%	0.00%	Test for evaluation of Topic 2.
Final test	65.00%	85.00%	It is mandatory to obtain a score > 4 over 10 in the final exam to add all other evaluable parts in the percentages shown in the table.

Total:	100.00%	100.00%	
---------------	----------------	----------------	--

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

Evaluation criteria for the final exam:

Continuous assessment:

It is mandatory to obtain a score > 4 over 10 in the final exam to add all other evaluable parts in the percentages shown in the table.
It is compulsory to pass the laboratory sessions and obtain a score of 4/10 in the laboratory test to pass the course.
The subject will be considered as passed if a minimum overall weighted score of 5 out of 10 is obtained.

Non-continuous evaluation:

Criteria will be the same.

At the beginning of the course, students should tell the professor if they wish to be evaluate non continuously

Specifications for the resit/retake exam:

For the retake exam only the the laboratory evaluation test can be re-taken, applying for the other sections the marks obtained during the duration of the course.

Specifications for the second resit / retake exam:

To pass this examination there will be only a final exam that will represent 100% of the mark, provided that the laboratory sessions have been performed and passed.
