Not established

3. Justification in the curriculum, relation to other subjects and to the profession

Not established

4. Degree com	npetences achieved in this course
Course compe	iences
Code	Description
A01	To understand and have knowledge in an area of study that moves on from the general education attained at secondary level and usually found at a level that, while supported in advanced text books, also includes some aspects that include knowledge found at the cutting edge of the field of study.
A02	To know how to apply knowledge to work or vocation in a professional manner and possess the competences that are usually demonstrated by the formulation and defence of arguments and the resolution of problems in the field of study.
A03	To have the capability to gather and interpret relevant data (normally within the area of study) to make judgements that include a reflection on themes of a social, scientific or ethical nature.
A04	To be able to transmit information, ideas, problems and solutions to a specialized audience.
A05	To have developed the learning skills necessary to undertake subsequent studies with a greater degree of autonomy.
A08	Appropriate level of oral and written communication.
A12	Knowledge of basic materials and technologies that assist the learning of new methods and theories and enable versatility to adapt to new situations.
A13	Ability to take the initiative to solve problems, take decisions, creativity, critical reasoning and ability to communicate and transmit knowledge, skills and abilities in Industrial Engineering and Automation.
A14	Knowledge to undertake measurements, calculations, evaluations, appraisals, studies, give expert opinions, reports, work plans and similar tasks.
A15	Ability to work to specifications and comply with obligatory rules and regulations.
A16	Ability to analyse and evaluate the social and environmental impact of technical solutions.
B04	Ability to understand and apply the principles of basic knowledge of general chemistry, organic and inorganic chemistry and their applications in engineering.

5. Objectives or Learning Outcomes

Course learning outcomes

Description

Be able to apply knowledge of the structure, properties, composition and transformation of materials in practical situations

Know the most important chemical processes relating to the chemical industry

Develop the ability to resolve chemistry problems with initiative, taking decisions and using critical reasoning

Acquire the ability to search for and select information in the field of Chemistry and be able to process and present it orally and in writing, developing the ability to synthesise information.

Acquire the ability to carry out work in groups

The student should be able to develop learning skills to enable them to undertake further studies with a high level of autonomy. The student should know the basic principles of chemistry, stimulating scientific reasoning

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

8. Evaluation criteria and Grading System							
Evaluation System	Continuous assessment	Non- continuous evaluation*	Description				
Theoretical papers assessment	0.00%	10.00%					
Laboratory sessions	0.00%	10.00%					
Progress Tests	0.00%	10.00%					
Final test	0.00%	70.00%					
Total:	0.00%	100.00%					

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).
