

UNIVERSIDAD DE CASTILLA - LA MANCHA

GUÍA DOCENTE

1. General information

Course: PLANNING AND MANAGEMENT OF COASTAL AREAS					Code: 310816			
Type: ELECTIVE					ECTS credits: 4.5			
2343 - MASTERS DEGREE PROGRAMME IN ENGINEERING OF ROADS, CANALS AND PORTS					Academic year: 2021-22			
Center: 603 - E.T.S. CIVIL ENGINEERS OF CR					Group(s): 20			
Ye			Duration: First semester					
Main language: English					Second language: Spanish			
Use of additional languages:				English Friendly: N				
Web site: Bilingual: N								
Lecturer: M ^a DEL CARMEN CASTILLO SANCHEZ - Group(s): 20								
Building/Office	Department	Phone number	Email		Office hours			
A-44	INGENIERÍA CIVIL Y DE LA	926052560	mariacarmen.castillo@uclm	1.es	To be set at the beginning of the semester			

2. Pre-Requisites

This subject adds to the knowledge obtained in the Coastal Engineering (Puertos y Costas) subject

3. Justification in the curriculum, relation to other subjects and to the profession

This subject adds to the knowledge obtained in the Coastal Engineering (Puertos y Costas) subject taking into consideration the value of the coast and its resources and the strategies to manage them.

4. Degree com	npetences achieved in this course
Course compe	tences
Code	Description
CB06	Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context.
CB07	Apply the achieved knowledge and ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to the area of study
CB09	Know how to communicate the conclusions and their supported knowledge and ultimate reasons to specialized and non-specialized aud non-specialized au
CB10	Have the learning skills which allow to continue studying in a self-directed or autonomous way
G01	Scientific-technical and methodological capacity for the continuous recycling of knowledge and the exercise of the professional functions of consultancy, analysis, design, calculation, project, planning, leadership, management, construction, maintenance, conservation and exploitation in the fields of civil engineering.
G02	Understanding of the multiple technical, legal and property constraints that arise in the design of a public work, and the capacity to establish different valid alternatives, to choose the optimum one and to express it adequately, anticipating the problems of its construction, and using the most suitable methods and technologies, both traditional and innovative, with the aim of achieving the greatest efficiency and promoting the progress and development of a sustainable and respectful society with the environment.
G03	Knowledge, understanding and ability to apply the necessary legislation in the exercise of the profession of Civil Engineer.
G06	Ability to plan, design, inspect and manage land (roads, railways, bridges, tunnels and urban roads) or sea (port works and facilities) transport infrastructures.
G07	Knowledge to apply technical and managerial skills in R&D&I activities in the field of civil engineering.
G10	Capacity to carry out studies on spatial planning, on the coastal environment, on coastal planning and defence and on environmental aspects related to infrastructures.
G25	Ability to identify, measure, enunciate, analyse, diagnose and scientifically and technically describe a civil engineering problem
G27	Ability to communicate in a second language.
G29	Management capacity and teamwork.
IAMA1	Capacity for the alternative selection and general planning of a civil engineering action applied to the water industry, analysing the technological, functional, economic and environmental aspects.
IAMA2	Capacity to identify, quantify and interpret the consequences of hydraulic, maritime and environmental works and actions
IAMA3	Ability to understand the design constraints and the functioning of the different maritime works.
IAMA4	Knowledge of the project factors (parameters, agents and actions) involved in the design of maritime works.
	Knowledge and skills to understand the dynamic phenomena involved in the ocean-atmosphere-coast environment and be able to
TE07	provide answers to littoral, port and coastal problems, including the impact of actions on the coastline. Capacity to carry out studies and projects of maritime works.
TE10	Capacity for planning, management and operation of civil engineering related infrastructures.
TE11	Ability to analyse the environmental factors involved in an engineering action
TE12	Ability to assess the impact an engineering work can have on the environment and to define appropriate corrective measures.

Course learning outcomes

Description

Students interpret the consequences on coastal resources of different forms of coastal occupation and port actions.

Students identify the variables to be considered in coastal planning and management.

Students understand the integration of ports into the territory, their importance in the economic framework and their functioning.

Students understand the determinants of coastal and port planning and management.

Students know the alternatives for maintaining/restoring beaches.

6. Units / Contents

Unit 1: Introduction

Unit 2: Basic definitions on Coastal Management

Unit 3: Beaches

- Unit 3.1 Stability and evolution models for beaches
- Unit 3.2 Beach nourishment (soft engineering)
- **Unit 3.3** Beach armoring (hard engineering)

Unit 4: Ports

Unit 4.1 Vessel-Port-Land relations

- Unit 4.2 Types of ports
- Unit 4.3 Port facilities

Unit 4.4 Operational conditions

Unit 4.5 Resource Planning

7. Activities, Units/Modules and Methodology								
Training Activity	Methodology	Related Competences (only degrees before RD 822/2021)	ECTS	Hours	As	Com	Description	
Class Attendance (theory) [ON- SITE]	Lectures	G02 G03 G06 G07 G10 G27 IAMA1 IAMA2 IAMA3 IAMA4 TE07 TE10	0.2	5	N			
Class Attendance (practical) [ON- SITE]	Combination of methods	CB07 G02 G06 G07 G10 G27 IAMA1 IAMA2 IAMA3 IAMA4 TE07 TE10	0.4	10	Y	N	During class hours. It cannot be retaken	
Computer room practice [ON-SITE]	Problem solving and exercises	CB07 G07 G10 G27 IAMA1 IAMA2 IAMA3 TE07 TE10	0.15	3.75	Y	N	Exercise solving using software	
Problem solving and/or case studies [ON-SITE]	Project/Problem Based Learning (PBL)	CB06 CB07 CB10 G02 G03 G06 G07 G10 G25 G27 G29 IAMA1 IAMA2 IAMA3 IAMA4 TE07 TE10 TE11 TE12	0.55	13.75	Y	N	Practical cases during class hours	
Study and Exam Preparation [OFF- SITE]	Self-study	CB06 CB07 CB10 G01 G02 G06 G07 G10 G25 G27 IAMA1 IAMA2 IAMA3 IAMA4 TE07 TE10	1	25	N			
Analysis of articles and reviews [OFF-SITE]	Reading and Analysis of Reviews and Articles	CB06 CB07 CB10 G01 G02 G06 G07 G10 G27 IAMA1 IAMA2 IAMA3 IAMA4 TE07 TE10	0.4	10	N			
Writing of reports or projects [OFF- SITE]	Group Work	CB06 CB07 CB09 CB10 G02 G03 G06 G07 G10 G25 G27 G29 IAMA1 IAMA2 IAMA3 IAMA4 TE07 TE10 TE11 TE12	1.2	30	Y	Y	Report of group work	
On-line Activities [OFF-SITE]	Combination of methods	CB09 G07 G10 G27 IAMA1 IAMA2 IAMA3 IAMA4 TE07 TE10	0.35	8.75	Y	Y	Exam on basic concepts	
Writing of reports or projects [OFF- SITE]	Problem solving and exercises	CB07 G02 G06 G07 G10 G27 IAMA1 IAMA2 IAMA3 IAMA4 TE07 TE10	0.2	5	N			
Project or Topic Presentations [ON- SITE]	project-based learning		0.05	1.25	Y	Y	Presentation of the results from the group work	
Total:							T	
I otal credits of in-class work: 1.35						_	Iotal class time hours: 33.75	
				Te	otal hours of out of class work: 78.75			

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

8. Evaluation criteria and Grading System							
Evaluation System	Continuous assessment	Non- continuous evaluation*	Description				
Assessment of active participation	10.00%	0.00%	Active participation in class. It cannot be retaken. (AP)				
Practicum and practical activities reports assessment	10.00%	0.00%	Short exercise resolution. It can be retaken (ER)				

According to a solution of the computer labor	5 00%	0.00%	Problem celuing using ceftware It can be retaken (PS)			
Assessment of activities done in the computer labs	35.00%	25.00%	Evaluated with the reports for each case. It can be retaken with			
Assessment of problem solving and/of case studies	33.00 %	33.00 %	another report (R)			
Oral presentations assessment	15.00%	15.00%	Oral exam based on presentation seminar and case report			
	10.00 /0	10.0070	(individually graded through group exam). It can be retaken (P)			
Final tost	25.00%	25.00%	Short test on basic concepts. It can be retaken with another			
	23.00 %	exam (ST)				
Oral procentations accomment	0.00%	25.00%	Oral presentation of a scientific paper/topic related with the			
Oral presentations assessment	0.00%	25.00%	subject. It cannot be retaken. Just one report per year			
Total:	100.00%	100.00%				

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

Evaluation criteria for the final exam:

Continuous assessment:

In order to pass the subject, the following minimum marks must be satisfied:

a) Reports for each case study (R): 4;

b) Presentation of cases (P): 4;

c) Final exam (ST): 4;

d) Global mark (0.1*AP+0.1*ER+0.05*PS+0.35*R+0.15*P+0.25*ST): 5;

Any details on content, extension and requirements of written exercises will be indicated on virtual campus at the beginning of the semester.

All minimum marks on this guide refer to (a maximum of) 10 points.

Non-continuous evaluation:

Unless stated otherwise, continuous evaluation criteria will be applied to all students.

Anyone choosing non-continuous assessment must notify it to the lecturer within the class period of the subject. The option is only available if the student₂s participation in evaluation activities (from the continuous assessment) has not reached 50% of the total evaluation for the subject. For the retake exam, the assessment type used for the final exam will remain valid.

All activities are individual

Any plagiarism will be sanctioned with a 0 in the corresponding global activity. Global activities are described in the Grading System table.

It is the same system for the retake exam.

Specifications for the resit/retake exam:

Same criteria as for the final exam apply

All activities that can be retaken are indicated on the Grading System table. For the rest, the marks remain unchanged.

For the retake exam, the assessment type used for the final exam will remain valid.

Specifications for the second resit / retake exam:

Same criteria as non-continuos evaluation
