4. Degree competences achieved in this course

Course	competences
--------	-------------

Code	Description
------	-------------

To know how to apply knowledge to work or vocation in a professional manner and possess the competences that are usually A02

demonstrated by the formulation and defence of arguments and the resolution of problems in the field of study.

To have the capability to gather and interpret relevant data (normally within the area of study) to make judgements that include a A03

reflection on themes of a social, scientific or ethical nature.

A04 To be able to transmit information, ideas, problems and solutions to both a specialist and non-specialist audience.

To have developed the learning skills necessary to undertake subsequent studies with a greater degree of autonomy.

A08 Appropriate level of oral and written communication.

Knowledge of basic materials and technologies that assist the learning of new methods and theories and enable versatility to adapt to A12

new situations.

Ability to take the initiative to solve problems, take decisions, creativity, critical reasoning and ability to communicate and transmit A13

knowledge, skills and abilities in Electrical Engineering.

Knowledge to undertake measurements, calculations, evaluations, appraisals, studies, give expert opinions, reports, work plans and A14

similar tasks

Knowledge of applied thermodynamics and heat transmission. Basic principles and their application in the resolution of engineering C01

problems.
