3. Justification in the curriculum, relation to other subjects and to the profession

The main objective of the subject is to analyse the different economic policies that stimulate entrepreneurship activity of a country, showing the direct and indirect effects that could have any influence on such activity.

Entrepreneurship has been considered during the last years as an important growth enhancing element. And for this reason it is necessary to determine the activities that would stimulate entrepreneurship activity.

So, it is necessary to analyze the different policies that would facilitate the achievement of this objective, showing in turn the derived effects due to the use of such policies, focusing essentially on those policies that promote entrepreneurship activity. Hereby there is completed the formation that students have received in the applied economics field.
