2. Pre-Requisites

It is convenient to have completed the subjects of Sports Management and Sports Facilities and Equipment.

3. Justification in the curriculum, relation to other subjects and to the profession

Local entities, in Sport Management, play a multiple role: administrator, coordinator, regulator, integrator, investor, evaluator and planner. In this sense, the municipalities have become the main protagonists in the promotion of physical activity and sport, they are the true promoters of the universalization of sport practice for the entire population.

Studying the development and growth opportunities of the sport sector at the local level, through professional and responsible management, knowing the necessary tools, without more limitation than the optimization of available resources, requires specific training and the use of different perspectives that in a complementary way contribute to improving public management and, as a consequence, the quality of life of people.

The need to have adequate management instruments to satisfy the demand of citizens, the needs of public managers and comply with current legislation, requires a "glocal" methodology with which you can think globally and act locally with the that the training of those students who want to carry out their professional future in the field of sports management will be facilitated.
