**2. Pre-Requisites**

Not established

**3. Justification in the curriculum, relation to other subjects and to the profession**

Not established

**4. Degree competences achieved in this course****Course competences**

Code	Description
A10	Ability to produce and develop projects in the field of industrial engineering and automation aimed at, and in accordance with the knowledge acquired as established in section 5 of Order CIN/351/2009, the construction, remodelling, repair, conservation, demolition, manufacturing, installation, assembly or use of: structures, mechanical equipment, power installations, electrical and electronic installations, industrial plants and installations and processes of manufacture and automatization.
A11	Ability to manage engineering project activities described in the previous competency.
CB01	Prove that they have acquired and understood knowledge in a subject area that derives from general secondary education and is appropriate to a level based on advanced course books, and includes updated and cutting-edge aspects of their field of knowledge.
CB02	Apply their knowledge to their job or vocation in a professional manner and show that they have the competences to construct and justify arguments and solve problems within their subject area.
CB03	Be able to gather and process relevant information (usually within their subject area) to give opinions, including reflections on relevant social, scientific or ethical issues.
CB04	Transmit information, ideas, problems and solutions for both specialist and non-specialist audiences.
CB05	Have developed the necessary learning abilities to carry on studying autonomously
F14	Acquisition of applied knowledge of energy saving and efficiency.
F15	Be familiar with the basic concepts of the capture, conversion and use of the sources of renewable energy and their application to the generation of electricity or use in heating/cooling systems.

**5. Objectives or Learning Outcomes****Course learning outcomes**

Not established.

**Additional outcomes****6. Units / Contents****Unit 1: Introduction to Hydrogen Technology & Fuel Cells****Unit 1.1** Context: Hydrogen as Energy Vector**Unit 1.2** Distributed Generation**Unit 1.3** Batteries**Unit 1.4** Application of Primary and Secondary Batteries**Unit 2: Hydrogen****Unit 2.1** Physicochemical Properties**Unit 2.2** Hydrogen Production: Reforming, Electrolysis, Thermochemical Cycles, Photoelectrochemical**Unit 2.3** Storage and Distribution**Unit 3: Fuel Cells****Unit 3.1** Introduction**Unit 3.2** Types of Fuel Cells**Unit 3.3** Triple Phase Boundaries and Electrode Processes**Unit 3.4** Thermodynamics**Unit 3.5** Fuel Cell Efficiency

**Unit 4: Fuel Cell Applications****Unit 4.1** Fuel Cell Systems**Unit 4.2** Hybrid Systems Renewables-Fuel Cells**Unit 4.3** Projects**7. Activities, Units/Modules and Methodology**

<b>Total:</b>			<b>6</b>	<b>150</b>			
<b>Total credits of in-class work: 2.4</b>			<b>Total class time hours: 60</b>				
<b>Total credits of out of class work: 3.6</b>			<b>Total hours of out of class work: 90</b>				

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

**8. Evaluation criteria and Grading System**

Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Final test	0.00%	100.00%	
Oral presentations assessment	30.00%	0.00%	
Progress Tests	40.00%	0.00%	
Practicum and practical activities reports assessment	20.00%	0.00%	
Assessment of problem solving and/or case studies	10.00%	0.00%	
<b>Total:</b>	<b>100.00%</b>	<b>100.00%</b>	

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

**9. Assignments, course calendar and important dates**
