2. Pre-Requisites

They are not needed. However, it is recommended to have previously completed and passed the subject "Introduction to Law: normative system and effectiveness".

3. Justification in the curriculum, relation to other subjects and to the profession

According the Report on the Degree in Labor Relations and Human Resources, the importance of human work in the economic, political and cultural spheres, as well as the complexity of this phenomenon, require approaching it from very different scientific perspectives: economic, the psychological, the sociological; but also and of course the administrative legal.

Therefore, and taking into account this premise, the subject "The activity of the Administration and the administrative procedure", which is taught in the first year of the Degree in Labor Relations and Human Resources, tries to offer a theoretical and practical approach to the concept, historical evolution, system of sources and organization of the Administration, without forgetting, of course and above all, the administrative procedure and act, as well as the mechanisms of control of these acts (administrative).

In addition, and all of the above, we must add that the basic knowledge that is learned in this subject will serve students to better understand other academic subjects other than strictly legal (and that must also be approved by students of the Degree in Relationships Labor and Human Resources); At the same time, it will offer you some tools for the proper development of your profession.

In short, and either because of its "direct" importance (as a branch of law in itself considered) or "indirect" (in relation to other branches of law and extra-legal or professional realities), include the subject "The activity of Administration and the administrative procedure "in the Degree of Labor Relations and Human Resources is amply justified.
