8. Evaluation criteria and Grading System			
Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Portfolio assessment	50.00%	50.00%	Where all the practices carried out during the course are collected.
Final test	25.00%	50.00%	About the theoretical and practical aspects exposed in class
Test	25.00%	0.00%	Tests carried out in the classroom throughout the course
Total:	100.00%	100.00%	

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

Evaluation criteria for the final exam:**Continuous assessment:**

The evaluation assumes that the final grade of the subject consists of different written tests that have a validity of 50% (25% corresponding to the final test and 25% to tests carried out in the classroom throughout the course).

The remaining 50% corresponds to the overall participation of the student in the different practical parts of the subject. This part will be assessed taking into account oral participation, presentation and presentation within the expected timeframes of the internship (no work will be accepted 24 hours after the proposed deadline in class), readings, presentations and proposed practices in Class.

If the student obtains a grade less than 4 in one of the three main parts of the evaluation (Portfolio, Final Test and tests taken in the classroom) he/she will not be able to pass the subject.

In that case you will have to carry out or submit the corresponding work in the extraordinary call for evaluation.

Written evidence and practices may be suspended for misspellings according to the criteria of the Faculty of Communication. The exercises, work and practices plagiarized will be grounds for suspense. In written tests and internships, the student will be evaluated on:

1. All theoretical material displayed and proposed by the teacher in class.
2. The topics that appear in the course of the subject.
3. The basic and complementary literature.
4. Recommended and mandatory books and reading articles.

In addition, the works and exercises presented in class by the teacher and the students will be the evaluable subject of the written tests with the aim of demonstrating the student's knowledge, skills, learning results, readings, degree of assimilation, the rigorousness of his reasoning and personal capacity. Students must submit 80% of the work or internships in order to qualify for the maximum grade and the continuous evaluation.

COVID-19. However, even in an unforeseen scenario, we will try to maintain the evaluation percentages as closely as possible to what is indicated in this guide

Non-continuous evaluation:

The non-continuous evaluation consists of the following tests:

Final test (50%). Evaluation on the theoretical contents of the subject.

Practical test (50%). In this test it will be compulsory to submit four practices (with a diversity of journalistic genres and at least one report, one chronicle and one interview among them) with the same requirements as the tests carried out during the course in the continuous assessment.

Any student may change to the non-continuous assessment mode as long as he/she has not participated during the period of classes in assessable activities that together account for at least 50% of the total assessment of the subject. If a student has reached this 50% of assessable activities or if, in any case, the period of classes has ended, he/she will be considered in continuous assessment without the possibility of changing assessment mode.

In order to pass the course it will be necessary to obtain a minimum of 4 in each of the tests (practical and theoretical).

The written and practical tests may be failed for spelling mistakes in accordance with the criteria of the Faculty of Communication. Plagiarized exercises, works and practices will be failed.

It is recommended that students who intend to sit this route contact the subject's teacher prior to the date of the test, to consult the characteristics and requirements of the practical test.

COVID-19. However, even in an unforeseen scenario, we will try to maintain the evaluation percentages as closely as possible to what is indicated in this guide

Specifications for the resit/retake exam:

In the extraordinary call the student will be examined in a final test of the theoretical contents discussed in class and in the subject. The same criteria apply as in the ordinary call. In order for the student to be able to submit for the extraordinary evaluation, he must submit all suspended or unsubmitted work in class two weeks before the examination of the extraordinary call, otherwise he will get a zero in that part. This part will make up 50% of the extraordinary evaluation, and the final test will involve 50%, and will consist of current tests, readings, theory and practice.

Specifications for the second resit / retake exam:

It is recommended that those students interested in attending this call contact the teacher before 30 September.
