2. Pre-Requisites

All the previous Modules must be passed before the Final Project can be presented

3. Justification in the curriculum, relation to other subjects and to the profession

The final Project allows student demonstrate the application of knowledge, capacity and attitude acquired during the Degree for the profession of Chemical Engineering, joining the theoretical knowledge with the professional expertise.

4. Degree competences achieved in this course**Course competences**

Code	Description
CB01	Prove that they have acquired and understood knowledge in a subject area that derives from general secondary education and is appropriate to a level based on advanced course books, and includes updated and cutting-edge aspects of their field of knowledge.
CB02	Apply their knowledge to their job or vocation in a professional manner and show that they have the competences to construct and justify arguments and solve problems within their subject area.
CB03	Be able to gather and process relevant information (usually within their subject area) to give opinions, including reflections on relevant social, scientific or ethical issues.
CB04	Transmit information, ideas, problems and solutions for both specialist and non-specialist audiences.
CB05	Have developed the necessary learning abilities to carry on studying autonomously
E23	Original exercise to be carried out individually and to present and defend before a university court, consisting of a project in the field of specific technologies of Chemical Engineering of a professional nature in which they synthesize and integrate the competences acquired in the teachings.
G01	Capacity for the direction, of the activities object of the engineering projects described in the competence G1.
G02	Knowledge in basic and technological subjects, which enables them to learn new methods and theories, and give them versatility to adapt to new situations.
G03	Ability to solve problems with initiative, decision making, creativity, critical reasoning and to communicate and transmit knowledge, skills and abilities in the field of Chemical Engineering.
G04	Knowledge for the realization of measurements, calculations, valuations, appraisals, surveys, studies, reports, work plans and other analogous works.
G05	Ability to handle specifications, regulations and mandatory standards.
G06	Ability to analyze and assess the social and environmental impact of technical solutions.
G07	Ability to apply the principles and methods of quality.
G08	Capacity for organization and planning in the field of the company, and other institutions and organizations.
G09	Ability to work in a multilingual and multidisciplinary environment.
G10	Knowledge, understanding and ability to apply the necessary legislation in the exercise of the profession of Industrial Technical Engineer
G11	Proficiency in a second foreign language at level B1 of the Common European Framework of Reference for Languages
G14	ethical commitment and professional ethics
G15	Management capacity and information planning
G16	Capacity for critical thinking and decision making
G17	Synthesis capacity
G18	Capacity for teamwork
G20	Ability to learn and work autonomously
G22	Creativity and initiative
G23	Leadership

8. Evaluation criteria and Grading System

Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Oral presentations assessment	40.00%	40.00%	
Portfolio assessment	60.00%	60.00%	
Total:	100.00%	100.00%	

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

Evaluation criteria for the final exam:**Continuous assessment:**

The student will deliver a speech for no more than 10-15 minutes of his or her Final Project and it will be evaluated by a Tribunal chosen by the Chemical Engineering Department of the UCLM.

Previously, the student must have delivered three hard-copies of his or her Final Project to the Secretary of the Chemical Department. The characteristics and the deadline for the presentation will be shown at the beginning of the Course in "Campus Virtual".

The percentage of the mark is as following: 40 %, the content of the Final Project; 30 %, the Oral Defense and 30 %, the marks of the Supervisor. The minimum mark in each section must be 4/10 and to pass the subject, the average mark must be 5/10 or higher.

Non-continuous evaluation:

Evaluation criteria not defined

Specifications for the resit/retake exam:

The same as for the Final Exam

Specifications for the second resit / retake exam:

The same as for the Final Exam
