4. Degree competences achieved in this course

4. Degree competenc	es achieved in this course
Course competences	
Code	Description
CB01	Prove that they have acquired and understood knowledge in a subject area that derives from general secondary education and is appropriate to a level based on advanced course books, and includes updated and cutting-edge aspects of their field of knowledge.
CB02	Apply their knowledge to their job or vocation in a professional manner and show that they have the competences to construct and justify arguments and solve problems within their subject area.
CB03	Be able to gather and process relevant information (usually within their subject area) to give opinions, including reflections on relevant social, scientific or ethical issues.
CB04	Transmit information, ideas, problems and solutions for both specialist and non-specialist audiences.
CB05	Have developed the necessary learning abilities to carry on studying autonomously
E16	Basic knowledge and application of environmental technologies and sustainability.
E17	Applied knowledge of business organization.
E19	Knowledge about material and energy balances, biotechnology, material transfer, separation operations, chemical reaction engineering, reactor design, and recovery and transformation of raw materials and energy resources.
E20	Capacity for analysis, design, simulation and optimization of processes and products.
E22	Ability to design, manage and operate simulation, control and instrumentation procedures of chemical processes.
E24	Knowledge and / or ability to handle chemical analysis equipment and property characterization, and the basic instruments of a chemical laboratory.
E26	Knowledge and capacity of management and specification of the main industrial equipment in the area of knowledge of chemical engineering
E27	Ability to compare and select between technological alternatives
E28	Ability to perform economic evaluations and establish the economic viability of a project
E29	Knowledge of the theory and capacity of use of the procedures of change of scale

Knowledge of the fundamentals and techniques of environmental analysis

Basic knowledge of the principles of transport phenomena and the kinetic and thermodynamic aspects of chemical processes

E33	Capacity for calculation and design, and knowledge about the operation, of water treatment processes including human supply,
E34	industrial conditioning and the treatment of urban and industrial waste effluents.
E35	Capacity for calculation and design, and knowledge about the operation, of gas treatment processes Capacity for calculation and design, and knowledge on the operation, of industrial waste management systems
E36	
E37	Capacity for calculation and design, and knowledge about the operation, of urban solid waste management systems
E38	Capacity for calculation and design, and knowledge about the mode of operation, of remediation processes of contaminated soils
	Knowledge of the main energy and industrial processes related to oil and / or coal.
E40 E41	Ability to evaluate and implement quality criteria in the chemical industry and chemical laboratories
E41	Applied knowledge about energy sources and capacity for energy evaluation and optimization of chemical processes Ability to write, sign and develop projects in the field of chemical engineering that are intended, according to the knowledge acquired as
E44	established in section 5 of order CIN / 351/2009 of February 9, construction, reform, repair, conservation, demolition, manufacture, installation, assembly or operation of: structures, mechanical equipment, energy installations, electrical and electronic installations, industrial facilities and processes and manufacturing and automation processes.
G01	Capacity for the direction, of the activities object of the engineering projects described in the competence G1.
G02	Knowledge in basic and technological subjects, which enables them to learn new methods and theories, and give them versatility to adapt to new situations.
G03	Ability to solve problems with initiative, decision making, creativity, critical reasoning and to communicate and transmit knowledge, skills and abilities in the field of Chemical Engineering.
G04	Knowledge for the realization of measurements, calculations, valuations, appraisals, surveys, studies, reports, work plans and other analogous works.
G05	Ability to handle specifications, regulations and mandatory standards.
G06	Ability to analyze and assess the social and environmental impact of technical solutions.
G07	Ability to apply the principles and methods of quality.
G08	Capacity for organization and planning in the field of the company, and other institutions and organizations.
G09	Ability to work in a multilingual and multidisciplinary environment.
G10	Knowledge, understanding and ability to apply the necessary legislation in the exercise of the profession of Industrial Technical Engineer
G11	Proficiency in a second foreign language at level B1 of the Common European Framework of Reference for Languages
G14	ethical commitment and professional ethics
G15	Management capacity and information planning
G16	Capacity for critical thinking and decision making
G17	Synthesis capacity
G18	Capacity for teamwork
G19	Ability to analyze and solve problems
G20	Ability to learn and work autonomously
G21	Ability to apply theoretical knowledge to practice
G22	Creativity and initiative
G23	Leadership
G24	Recognition of diversity, multiculturalism and gender equality
G25	Obtaining skills in interpersonal relationships
G26	Obtaining skills in interpersonal relationships.

5. Objectives or Learning Outcomes

Course learning outcomes

Description

To know the applications of chemical engineering in processes and energy engineering.

To develop in the student the capacity of initiative to raise and solve specific problems of Organic Chemistry, as well as to interpret the results obtained.

To acquire the capacity for the ethical exercise of the profession and become socially aware of their reports and impact of their decisions.

To know some of the main professional activities of the chemical industry sector.

To have the ability to work in a team, responsibility in performance and responsible management and leadership strategies.

To have the skill for practical work, being able to develop it in coordination with other professionals.

To be able to analyze and assess the social and environmental impact of technical solutions ${\sf S}$

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

8. Evaluation criteria and Grading System							
Evaluation System	Continuous assessment	Non- continuous evaluation*	Description				
Final test	10.00%	10.00%					
Self Evaluation and Co-evaluation	90.00%	90.00%					
Total:	100.00%	100.00%					

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).
