4. Degree competences achieved in this course**Course competences**

Code	Description
CB02	Apply their knowledge to their job or vocation in a professional manner and show that they have the competences to construct and justify arguments and solve problems within their subject area.
CB03	Be able to gather and process relevant information (usually within their subject area) to give opinions, including reflections on relevant social, scientific or ethical issues.
CB04	Transmit information, ideas, problems and solutions for both specialist and non-specialist audiences.
CB05	Have developed the necessary learning abilities to carry on studying autonomously
E03	Handle chemicals safely and with respect to the environment
E11	Know the basic operations and the unitary processes of the chemical industry
E14	Know and know how to apply the metrology of chemical processes, including quality management
E15	Know how to handle the standard chemical instrumentation and be able to elaborate and manage standardized procedures of work in the laboratory and chemical industry
E16	Plan, design and develop projects and experiments
E17	Develop the ability to relate to each other the different specialties of Chemistry, as well as this one with other disciplines (interdisciplinary character)
G02	Be able to gather and interpret data, information and relevant results, obtain conclusions and issue reasoned reports on scientific, technological or other problems that require the use of chemical tools
G03	Know how to apply the theoretical-practical knowledge acquired in the different professional contexts of Chemistry
G05	Acquire and adapt new knowledge and techniques of any scientific-technical discipline with incidence in the chemical field
T04	Ethical commitment and professional ethics
T05	Organization and planning capacity
T06	Ability to approach decision making
T07	Ability to work as a team and, where appropriate, exercise leadership functions, fostering the entrepreneurial character
T08	Skills in interpersonal relationships
T09	Motivation for quality, job security and awareness of environmental issues, with knowledge of internationally recognized systems for the correct management of these aspects

5. Objectives or Learning Outcomes**Course learning outcomes****Description**

Become aware of the importance of teamwork, responsibility in performance, and responsible management strategies and leadership.

Train the student for autonomous work and learning, as well as for personal initiative.

Train the student to be sensitive to the ethical exercise of the profession, becoming aware of the social responsibility of their reports and their impact on decision making

Train the student to solve problems based on the use of chemical tools and techniques.

Acquire training in the way of working of the chemical professional in organizations (companies, institutions, laboratories, etc.) where the profession can potentially practice

Acquire skills for practical work, being able to develop it in coordination with other professionals.

Know the principles on the management of professional activity in different types of organizations

Know some of the main professional activities of the graduate in chemistry

Know the applications of chemistry in the agri-food, environmental, clinical, pharmaceutical and industrial fields

6. Units / Contents

Total:			12	300			
			Total credits of in-class work: 10.7		Total class time hours: 267.5		
			Total credits of out of class work: 1.3		Total hours of out of class work: 32.5		

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

8. Evaluation criteria and Grading System

Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Final test	30.00%	30.00%	
Practicum performance	40.00%	40.00%	
Practicum and practical activities reports assessment	30.00%	30.00%	
Total:	100.00%	100.00%	

According to art. 6 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 13.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).
