Building/Office	Department	Phone number	Email	Office hours
3.17	ECONOMÍA APLICADA I		isabel.pardo@uclm.es	

2. Pre-Requisites

No prior requirements are established but we recommend students have completed Economic Policy I and have knowledge of macroeconomics as well as user-level office computer skills.

3. Justification in the curriculum, relation to other subjects and to the profession

The aim of the subjects in the area of economic policy is for students to acquire knowledge of the logic of the decision making process, the inclusion of the goals of economic policy in the general framework of political objectives, the use of instruments to achieve these goals and the effects of these means on the particular environment of institutions and enterprises.

The general aim is, then, for students to acquire more extensive knowledge and understanding of economic reality, the logic behind the actions of the main economic agents, so as to be able to evaluate (both quantitatively and qualitatively) the different actions of public decision makers and to identify the effect of these actions on the activity of economic agents.

4. Degree competences achieved in this course**Course competences**

Code	Description
E02	Understand the role of institutions and economic agents in economic and social activities.
E05	Ability to contribute to the establishment of strategies which will allow for the efficient allocation of resources, the generation of wealth and a suitable distribution of income.
E08	Know the different types of government intervention, as well as the fundamental premises of welfare economics.
E10	Ability to design and implement policies and strategies promoting competition and market restructuring.
G01	Possession of the skills needed for continuous, self-led, independent learning, which will allow students to develop the learning abilities needed to undertake further study with a high degree of independence.
G02	Ability to understand the ethical responsibility and the code of ethics of professionals working in the field of economics. To know, respect and contribute to the fulfillment of the commitments related to gender equality, non-discrimination, human rights legislation and development cooperation.
G03	Develop oral and written communication skills in order to prepare reports, research projects and business projects and defend them before any commission or group of professionals (specialised or non-specialised) in more than one language, by collecting relevant evidence and interpreting it appropriately so as to reach conclusions.
G04	Ability for the use and development of information and communication technology in the development of professional activity.
G05	Capacity for teamwork, to lead, direct, plan and supervise multidisciplinary and multicultural teams in both national and international environments.

5. Objectives or Learning Outcomes**Course learning outcomes****Description**

Be able to identify analytical models and techniques of the economic, legal and social environment and their historical development

Know the main macroeconomic variables and the economic policy instruments.

Enable student for autonomous work and learning, as well as for personal initiative
