UNIVERSIDAD DE CASTILLA - LA MANCHA

GUÍA DOCENTE

1. General information

Course: MATHEMATICS FOR ECONOMICS I
Code: 53304
Type: BASIC
ECTS credits: 9
Degree: 316 - UNDERGRADUATE DEGREE IN ECONOMICS
Academic year: 2022-23
Center: 5 - FACULTY OF ECONOMICS AND BUSINESS
Group(s): 10 17
Year: 1
Duration: AN
Main language: Spanish
Second language:
Use of additional languages:
English Friendly: Y
Web site:
Bilingual: N

Lecturer: **MARIA ELISA AMO SAUS** - Group(s): **10 17**

Building/Office	Department	Phone number	Email	Office hours
Melchor de Macanaz/3.05	ANÁLISIS ECONÓMICO Y FINANZAS	926053077	elisa.amo@uclm.es	

Lecturer: **JUAN FRANCISCO ORTEGA DATO** - Group(s): **10 17**

Building/Office	Department	Phone number	Email	Office hours
Melchor de Macanaz	ANÁLISIS ECONÓMICO Y FINANZAS	926053328	juanfco.ortega@uclm.es	

2. Pre-Requisites

In general, the knowledge that is required to successful follow a course in maths relates with the basic algebraic properties of polynomials, logarithms and solving linear equations. It is relevant a basic use of derivatives, including the standard techniques (sums, products and chain rule), as well as basic integration. Finally, it is also important to know the basic techniques for function representations and in particular the representation of the main functions.

3. Justification in the curriculum, relation to other subjects and to the profession

The courses in maths in this degree, provide with formal methods to other courses in the degree, like Statistics, Economy and Finance.

In relation with professional skills, the main goal of the course is to introduce, from a mathematical perspective, the models and methods of quantitative analysis, including methods for decision making.

4. Degree competences achieved in this course

Course competences

Code	Description
E03	Ability to find economic data and select relevant facts.
E06	Application of profesional criteria to the analysis of problems, based on the use of technical tools.
G01	Possession of the skills needed for continuous, self-led, independent learning, which will allow students to develop the learning abilities needed to undertake further study with a high degree of independence.
G03	Develop oral and written communication skills in order to prepare reports, research projects and business projects and defend them before any commission or group of professionals (specialised or non-specialised) in more than one language, by collecting relevant evidence and interpreting it appropriately so as to reach conclusions.
G04	Ability for the use and development of information and communication technology in the development of professional activity.
G05	Capacity for teamwork, to lead, direct, plan and supervise multidisciplinary and multicultural teams in both national and international environments.

5. Objectives or Learning Outcomes

Course learning outcomes

Description

Train the student to work out problems in creative and innovative ways.

Train the student to listen to and defend arguments orally or in writing

To know the tools and methods for quantitative analysis of markets, sectors and companies, including models for decision-making and economic forecasting models.

Enable student for autonomous work and learning, as well as for personal initiative

Train the student to search for information in order to analyze it, interpret is meaning, synthesize it and communicate it to others.

Additional outcomes

6. Units / Contents

Unit 1: Basic Elements of Linear Algebra

Unit 2: Vector Space Rn

Unit 3: Linear applications and associated matrices

Unit 4: Matrix diagonalization
Unit 5: Quadratic forms
Unit 6: Real numbers. Sequences and Series
Unit 7: Real functions of a real variable
Unit 8: Real functions of a real variable
Unit 9: The definite integral

ADDITIONAL COMMENTS, REMARKS

This subject, Matemáticas I para la Economía, consists of 5 units of Linear Algebra (units 1-5), 2 units of one-variable Calculus (units 6 and 7) and 2 units of Integration (units 8 and 9).

7. Activities, Units/Modules and Methodology

Training Activity	Methodology	Related Competences (only degrees before RD 822/2021)	ECTS	Hours	As	Com	Description
Class Attendance (theory) [ON-SITE]	Lectures	E03 E06 G01 G03 G04	2	50	N	-	
Class Attendance (practical) [ON-SITE]	Problem solving and exercises	E03 E06 G01 G03 G04	1	25	N	-	
Other on-site activities [ON-SITE]	Assessment tests	E03 E06 G01 G03 G04	0.08	2	Y	Y	
Progress test [ON-SITE]	Assessment tests	E03 E06 G01 G03 G04 G05	0.08	2	Y	Y	
Final test [ON-SITE]	Assessment tests	E03 E06 G01 G03 G04	0.12	3	Y	Y	
Other off-site activity [OFF-SITE]	Problem solving and exercises	E03 E06 G01 G03 G04 G05	2.18	54.5	N	-	
Study and Exam Preparation [OFF-SITE]	Self-study	E03 E06 G01 G03 G04 G05	2.68	67	N	-	
Study and Exam Preparation [OFF-SITE]	Self-study	E03 E06 G01 G03 G04	0.78	19.5	N	-	
Mid-term test [ON-SITE]	Assessment tests	E03 E06 G01 G03 G04	0.08	2	Y	Y	
		Total:	**9**	**225**			
		Total credits of in-class work: 3.36					**Total class time hours: 84**
		Total credits of out of class work: 5.64					**Total hours of out of class work: 141**

As: Assessable training activity
Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

8. Evaluation criteria and Grading System

Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Final test	0.00%	100.00%	
Mid-term tests	35.00%	0.00%	
Assessment of active participation	10.00%	0.00%	
Progress Tests	5.00%	0.00%	
Mid-term tests	35.00%	0.00%	
Assessment of active participation	10.00%	0.00%	
Progress Tests	5.00%	0.00%	
Total:	**100.00%**	**100.00%**	

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject , an ordinary and an extraordinary one (evaluating 100% of the competences).

Evaluation criteria for the final exam:

Continuous assessment:

The subject follows an evaluation system based on the assessment of various training activities and an exam. The student is required to obtain at least a 4 in the final evaluation test to make an average with the grade obtained in the rest of the proposed training activities. Any student may change to the non-continuous assessment mode as long as they have not participated during the class teaching period in assessable activities that together account for at least 50% of the total assessment of the subject and, in that case, they must communicate it before the end of the class period.

Regarding the evaluation in case of illness or other special circumstances (mitigating rules), see article 6 of the Student Evaluation Regulation of the University of Castilla-La Mancha.

Non-continuous evaluation:

The evaluation will be carried out with a final test that will include the specific tests that are considered necessary to evaluate all the competencies of the subject.
Regarding the evaluation in case of illness or other special circumstances (mitigating rules), see article 6 of the Student Evaluation Regulation of the University of Castilla-La Mancha.

Specifications for the resit/retake exam:

If the student has passed any of the partial exams in the ordinary call with a grade of 5 or higher, they will not have to re-examine that part and will only recover the one they have not passed. In case of not having passed any of the two, the student will have to take an exam for the entire subject.

Specifications for the second resit / retake exam:

The evaluation will be carried out on a single written exam, being necessary to pass the subject a minimum score of 5 out of 10.

9. Assignments, course calendar and important dates
