2. Pre-Requisites

Not established

3. Justification in the curriculum, relation to other subjects and to the profession

The subject of Pharmacology and First Aid is located within the elective credits, which allow the Physiotherapy Degree student to expand their training in topics related to health.

The physiotherapist is part of the Health Team, developing his professional activity, both in the hospital and out-of-hospital settings. As a health professional, it is convenient for you to be able to know and identify certain emergency situations that may be found both in the development of your professional activity and throughout your personal life; as well as providing the first attention until the arrival of professional medical assistance. Similarly, you must know the principles associated with the administration of medications for proper use.

The objective of this subject is to equip the student with the knowledge, skills and attitudes that allow them to provide quality care to individuals in emergency situations.

This subject is linked among others with the subjects of Human Morphology I and II, Biochemistry and General Pathology.

4. Degree competences achieved in this course						
Course competenc	es					
Code	Description					
CB1	Prove that they have acquired and understood knowledge in a subject area that derives from general secondary education and is appropriate to a level based on advanced course books, and includes updated and cutting-edge aspects of their field of knowledge.					
CB2	Apply their knowledge to their job or vocation in a professional manner and show that they have the competences to construct and justify arguments and solve problems within their subject area.					
CB3	Be able to gather and process relevant information (usually within their subject area) to give opinions, including reflections on relevant social, scientific or ethical issues.					
CB4	Transmit information, ideas, problems and solutions for both specialist and non-specialist audiences.					
CB5	Have developed the necessary learning abilities to carry on studying autonomously					
E16	Students must know the physiopathology, etiology, clinical picture, and diagnosis of syndromes and diseases, as well as the approach to their medical-surgical treatment in terms of the most relevant aspects for Physiotherapy.					
G01	Students must show their ability to make educated decisions and solve problems based on available knowledge and information within their field of study.					
G04	Students must show their skills in terms of verbal and written communication in Spanish.					
G05	Students must show their ability to manage information properly.					
G10	Students must show sensitivity and respect towards personal and cultural diversity in their professional activity.					
G17	Students must behave responsibly in all professional activities related to patients, relatives, and the work team.					
G21	Students must know and adapt to the limits of their professional competences.					

5. Objectives or Learning Outcomes

Course learning outcomes

Description

To identify situations of impairment for the individual to fulfill their basic needs.

To identify the most common emergency situations.

To know the principles for drugs administering.

To act in such situations, correctly prioritizing at all times. Additional outcomes

Knowing the principles of basic life support and CPR with DESA

6. Units / Contents

Unit 1: General Principles of Pharmacology

- Unit 1.1 General principles of pharmacokinetics
- Unit 1.2 General principles of pharmacodynamics

Unit 2: Basic needs of the individual and assessment in emergency situations

Unit 3: Basic interventions in minor accidents and trauma

- Unit 3.1 Bleeding, wounds and burns
- Unit 3.2 Bites and stings

Unit 3.3 Hypothermia and hyperthermia

- Unit 3.4 Acute poisonings
- Unit 3.5 Allergic reactions

Unit 3.6 Care for the multi-trauma patient

Unit 4: Basic cardiopulmonary resuscitation

Unit 5: Basic interventions in emergency situations, for pathologies

Unit 5.1 Cardiovascular emergencies

Unit 5.2 Neurological emergencies

Unit 5.3 Metabolic emergencies

Unit 5.4 Pain management in emergencies

Unit 5.5 Ophthalmic and otorhinolaryngological emergencies

Unit 5.6 Psychiatric emergencies

Unit 5.7 Gynecological and obstetric emergencies

Unit 6: Actions in situations of abuse

7. Activities, Units/Modules and I	Methodology							
Training Activity	Methodology	Related Competences (only degrees before RD 822/2021)	ECTS	Hours	As	Com D	escription	
Laboratory practice or sessions [ON-SITE]	Practical or hands-on activities	E16 G01 G04 G05 G10 G17 G21	0.48	12	Y		imulated practice of techniques in mergency situations. The orresponding skills will be assessed n the final practical test.	
Group tutoring sessions [ON-SITE]	Problem solving and exercises	E16 G05 G10 G17 G21	0.04	1	Y		roubleshooting or cases. The orresponding competences will be valuated in the test corresponding o problems or cases.	
Study and Exam Preparation [OFF- SITE]	Self-study	E16 G01 G04 G05 G10 G17 G21	2.7	67.5	N	-	utonomous study of the contents of ne subject	
Final test [ON-SITE]	Assessment tests	CB1 CB2 CB3 CB4 CB5 E16 G01 G04 G05 G10 G17 G21	0.08	2	Y		emonstration of knowledge through rritten test	
Class Attendance (theory) [ON- SITE]	Lectures	E16 G01 G04 G05 G10 G17 G21	1.2	30	Y	CC N TI be	he teachers will indicate the main ontents and objectives pursued. he corresponding competences will e evaluated in the theoretical part of he final test	
		Total:	4.5	112.5				
Total credits of in-class work: 1.8				Total class time hours: 45				
Total credits of out of class work: 2.7				Total hours of out of class work: 67.5				

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

8. Evaluation criteria and Grading System						
Evaluation System	Continuous assessment	Non- continuous evaluation*	Description			
Theoretical exam	80.00%	180 00%	Assessment of the acquisition of knowledge through a written test: items with multiple choice or short questions.			
Practical exam	10.00%	10.00%	Assessment of the ability and skill in conducting proceedings and			
Assessment of problem solving and/or case studies	10.00%	10.00%	There will be tutorials and group work.			
Total:	100.00%	100.00%				

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

Evaluation criteria for the final exam:

Continuous assessment:

They are the ones indicated for each evaluation activity.

The final exam will consist of 50 to 70 multiple choice questions with four alternative answers. The wrongly answered questions will subtract points in the final score of the test: every three wrongly answered questions will subtract one point or the corresponding percentage.

It is necessary to pass the final theoretical test with a score higher than 40% of the rating score.

The resolution of problems or cases will be group activities corresponding to each topic of the subject, of which at least one will consist of an oral presentation of the proposed case.

The final weighted sum of all the assessment tests must be equal to or greater than 5 (out of 10).

Non-continuous evaluation:

The evaluation of the activities that replace the continuous evaluation will be carried out through a specific test in which the competences related to the different training activities will be evaluated.

Specifications for the resit/retake exam:

The exam will be of similar characteristics to those of the ordinary call. The scores of the "practice" and "resolution of problems and cases" parts of the subject, will be saved for the extraordinary call if they have been passed in the ordinary call, according to the rules specified in that call.

Specifications for the second resit / retake exam:

The exam will be of similar characteristics to those of the ordinary and extraordinary calls.
