

UNIVERSIDAD DE CASTILLA - LA MANCHA  
GUÍA DOCENTE

1. General information

Course: FUNDAMENTALS OF PHYSICS I  
Type: BASIC  
Degree: 422 - UNDERGRADUATE DEGREE IN BIOMEDICAL ENGINEERING  
Center: 308 - SCHOOL POLYTECHNIC OF CUENCA  
Year: 1

Code: 59703  
ECTS credits: 6  
Academic year: 2023-24  
Group(s): 30  
Duration: First semester  
Second language:  
English Friendly: Y  
Bilingual: N

Main language: Spanish

Use of additional languages:

Web site:

Lecturer: <b>JOAN MIQUEL GALVE ROMERO</b> - Group(s): 30					
Building/Office	Department	Phone number	Email	Office hours	
Escuela Politécnica de Cuenca/IDR	FISICA APLICADA	+34926053217	joanmiquel.galve@uclm.es	The updated tutorial schedule can be consulted in the virtual secretary	
Lecturer: <b>RAQUEL RAMÍREZ VÁZQUEZ</b> - Group(s): 30					
Building/Office	Department	Phone number	Email	Office hours	
	FISICA APLICADA		Raquel.Ramirez@uclm.es		
Lecturer: <b>SERGIO RUBIO LUQUE</b> - Group(s): 30					
Building/Office	Department	Phone number	Email	Office hours	
	INGENIERÍA ELÉCTRICA, ELECTRÓNICA, AUTOMÁTICA Y COMUNICACIONES		Sergio.Rubio@uclm.es		

2. Pre-Requisites

Since this is a subject that begins in the first semester, it is not necessary to have specific knowledge of any other subject, although it is necessary the basic knowledge of secondary education, especially in physics and mathem

3. Justification in the curriculum, relation to other subjects and to the profession

The subject of physics of the Degree in Biomedicine Engineering is divided into two subjects belonging to the block of basic subjects of the degree. Fundamentals of Physics I describes the physical laws and scientific bases of t

4. Degree competences achieved in this course

Course competences

Code	Description
INFO-2023	

5. Objectives or Learning Outcomes

Course learning outcomes

Description  
CT01 - To know and apply Information and Communication Technologies.  
CT02 - To use properly oral and written communication.  
CT03 - To know ethical commitment and professional deontology.  
CN02 - To understand and master basic concepts of the general laws of mechanics, thermodynamics, fields and waves, and electromagnetism, as well as apply them to solve engineering problems.

6. Units / Contents

Unit 1: Physical magnitudes

- Unit 1.1 Dimensional analysis
- Unit 1.2 Errors treatment
- Unit 1.3 Review operations with vectors
- Unit 1.4 PRACTICE 1. The measurement and its treatment

Unit 2: Kinematics

- Unit 2.1 Rectilinear motion
- Unit 2.2 Circular motion
- Unit 2.3 Simple harmonic motion
- Unit 2.4 Motion composition
- Unit 2.5 PRACTICAL EXERCISE. Study of 2D motion using Excel
- Unit 2.6 PRACTICAL EXERCISE. Calculation of speeds and numerical accelerations using Excel

Unit 3: Dynamics

- Unit 3.1 Forces. Newton's Laws
- Unit 3.2 Work and energy
- Unit 3.3 Power

Unit 4: Mechanical oscillators

- Unit 4.1 Damped oscillators
- Unit 4.2 Forced oscillators
- Unit 4.3 Electrical analogy. RCL circuit
- Unit 4.4 PRACTICE 2. Study of the elastic constant of a spring

Unit 5: One-dimensional waves. The vibrating rope

- Unit 5.1 Mechanical waves on a forced rope at one end
- Unit 5.2 Reflection and transmission of waves on a vibrating string
- Unit 5.3 Own modes on a finite length string
- Unit 5.4 PRACTICE 3. Stationary waves on a string

Unit 6: Two-dimensional waves. Vibrating membranes

- Unit 6.1 Two-dimensional. Helmholtz Equation
- Unit 6.2 Own modes in 2D
- Unit 6.3 PRACTICAL EXERCISE. Own modes in a rectangular membrane with Matlab

Unit 7: Fundamentals of thermology

- Unit 7.1 Thermal expansion
- Unit 7.2 Ideal gases
- Unit 7.3 Laws of thermodynamics
- Unit 7.4 Heat transfer

Unit 8: Three-dimensional waves. Acoustic waves

- Unit 8.1 Acoustic wave equation in 3D. Flat waves and spherical waves
- Unit 8.2 Intensity and intensity level
- Unit 8.3 Own modes in rooms
- Unit 8.4 Acoustic waveguides

ADDITIONAL COMMENTS, REMARKS

The didactic material used in the development of the subject, and which is available in the virtual platform of the course, is:

- Software: Excel and Matlab
- Notes: transparencies of the subject.
- Collection of exercises
- Practices manual

7. Activities, Units/Modules and Methodology

Training Activity	Methodology	Related Competences (only degrees before RD 822/2021)	ECTS	Hours	As	Com	Description
Class Attendance (theory) [ON-SITE]	Lectures	INFO-2023		1	25	N	Theoretical classes of the subject in which the syllabus is developed
Class Attendance (practical) [ON-SITE]	Problem solving and exercises	INFO-2023		1	25	N	During the classes there will be demonstrations and exercises of those required points

Computer room practice [ON-SITE]	Practical or hands-on activities	INFO-2023	0.12	3	Y	Y	During the practical sessions, the realization of the practicals and the results obtained will be evaluated in-situ. In the case of not being able to attend the sessions for justified reasons, in the ordinary exam there will be a test that allows to pass this part.
Laboratory practice or sessions [ON-SITE]	Practical or hands-on activities	INFO-2023	0.12	3	Y	Y	During the laboratory sessions, the performance of the practices and the results obtained will be evaluated in-situ. In the case of not being able to attend the sessions for justified reasons, in the ordinary call there will be a test that allows to pass this part.
Writing of reports or projects [OFF-SITE]	Self-study	INFO-2023	1.6	40	Y	Y	In general, for each of the practices a report will be delivered describing the work carried out, and showing the results and analysis, as well as the main conclusions. If plagiarism is detected in any of the deliveries, the grade will be 0 points in that activity, both for the person / group who has plagiarized and for the one who has allowed it (art. 9 REE).
Study and Exam Preparation [OFF-SITE]	Self-study	INFO-2023	2	50	N	N	Autonomous work of the student to prepare the subject
Individual tutoring sessions [ON-SITE]	Guided or supervised work	INFO-2023	0.04	1	N	N	Resolution of doubts and review of grades
Mid-term test [ON-SITE]	Assessment tests	INFO-2023	0.04	1	Y	Y	1 or 2 written evaluation tests will be established throughout the semester. This activity will be recovered with a new test in ordinary or extraordinary exams. The fraudulent realization of the tests will suppose a grade of 0 points (art. 9 REE).
Final test [ON-SITE]	Assessment tests	INFO-2023	0.08	2	Y	Y	Corresponds to the test to be carried out on the date of the ordinary exam. This activity will be recovered with a new test on the date of the extraordinary exam. The fraudulent realization of the tests will suppose a grade of 0 points (art. 9 REE).
<b>Total:</b>			<b>6</b>	<b>150</b>			
<b>Total credits of in-class work: 2.4</b>			<b>Total class time hours: 60</b>				
<b>Total credits of out of class work: 3.6</b>			<b>Total hours of out of class work: 90</b>				

As: Assessable training activity

Com: Training activity of compulsory overcoming (It will be essential to overcome both continuous and non-continuous assessment).

## 8. Evaluation criteria and Grading System

Evaluation System	Continuous assessment	Non-continuous evaluation*	Description
Test	80.00%	80.00%	Proof of progress will be weighted to obtain a numerical score between 0 and 10. This test can be divided into partial tests made throughout the course, where theoretical / practical knowledge will be evaluated. At least 10% of the progress tests must include the individualized grade of the work done in group by the students. This qualification will represent 80% of the total grade of the subject
Laboratory sessions	20.00%	20.00%	The exercises and delivery questionnaires solved in the classroom and at home, together with the laboratory practices and their public exposure will mean a numerical grade from 0 to 10. This qualification will mean 20% of the total grade of the subject. Students who can not attend laboratory practices should contact the responsible teacher at the beginning of the semester.
<b>Total:</b>	<b>100.00%</b>	<b>100.00%</b>	

According to art. 4 of the UCLM Student Evaluation Regulations, it must be provided to students who cannot regularly attend face-to-face training activities the passing of the subject, having the right (art. 12.2) to be globally graded, in 2 annual calls per subject, an ordinary and an extraordinary one (evaluating 100% of the competences).

### Evaluation criteria for the final exam:

#### Continuous assessment:

It is necessary to obtain a grade greater than or equal to 4 points in each of the written tests to be able to average with the rest of the evaluation activities. The average of all the evaluation activities must be equal to or greater than 5 points to pass the subject.

The final exam will be a global test that allows to overcome separately both the practices and the theoretical / practical contents developed throughout the course for those students who have not passed any of the partial evaluation tests.

#### Non-continuous evaluation:

The final exam will be a global test that allows to overcome separately both the practices and the theoretical / practical contents developed throughout the course for those students who have not passed any of the partial evaluation tests.

### Specifications for the resit/retake exam:

The final exam will be a global test of the whole subject

## 9. Assignments, course calendar and important dates

### Not related to the syllabus/contents

Hours	hours
Computer room practice [PRESENCIAL][Practical or hands-on activities]	3
Laboratory practice or sessions [PRESENCIAL][Practical or hands-on activities]	3
Writing of reports or projects [AUTÓNOMA][Self-study]	40
Study and Exam Preparation [AUTÓNOMA][Self-study]	50
Individual tutoring sessions [PRESENCIAL][Guided or supervised work]	1
Mid-term test [PRESENCIAL][Assessment tests]	1
Final test [PRESENCIAL][Assessment tests]	2
<b>General comments about the planning:</b> The units will be taught consecutively adapting to the actual calendar that is held in the semester in which the subject is located. Works will be asked with a periodicity of two weeks, corresponding to the taught agenda. It is also planned to conduct a progress test, not mandatory, mid-term equivalent to 40% of the final grade of the subject. Also depending on the progress of the subject, the planning will be adapted.	
<b>Unit 1 (de 8): Physical magnitudes</b>	
<b>Activities</b>	<b>Hours</b>
Class Attendance (theory) [PRESENCIAL][Lectures]	1
